Introduction:

This study deals with 234 medical researches of Mansoura university affiliations, which has been indexed and abstracted in MEDLINE on CD-ROM¹, from January 1992 to March 1999. Analysis of these researches show that those 7 faculties, 3 medical centers and the university hospitals have performed these researches. 383 researchers (authors) have participated in these researches, which are all in English language, and published as journal articles in 86 medical journals in 31 countries including Egypt. The data show that most of the research's subject categories are concentrated on Urology and Nephrology.

It might be mentioned that the data of this study has been electronically extracted, organized, edited and indexed.

Mansoura University²:

The Faculty of Medicine was founded in 1962 as a branch of Cairo University. A presidential decree declared the establishment of East Delta University in 1972.

The name was changed to University of Mansoura in 1973. It is considered the sixth in order of establishment among the thirteen Universities of Egypt. The University campus covering about 300 acres, lies in the South West of the city of Mansoura. It comprises faculties of Medicine, Dentistry, Pharmacy, Engineering, Agriculture, Commerce, Law, Science, Education, Nursing and Computer & Information. It also comprises some servicing units, like General Management of Student's Patronage with its vast courts and buildings, University Hostels, University Hospitals, Specialized Medical Centers, and most of the autonomous units that serve the University and the Community.

The complex for student services is now under construction. It will include a commercial center, modern kitchens, social club, libraries and restaurants for students, staff members and employees. It will also include a modern hospital for students.

The faculties of Veterinary Medicine, Physical Education and Arts are off campus, with the former on Ahmed Maher street and the other on the extension. In Addition, in Damietta city, there are faculties of Science and Education, a branch of the Faculty of

Commerce and classes of the faculties of Arts and Agriculture.

This year (1999/2000), 81600 undergraduate and an average of 5000 postgraduate students are enrolled in the different faculties. About 8000 students graduate each year from the University. As well as 1300 postgraduate students obtain their diplomas, masters and doctorate degrees.

About 2000 staff members and 1000 demonstrators, and assistant lecturers render academic services. Over 11000 employees and workers amongst them 4000 in medical fields offer administrative, financial and technical services.

Mansoura University has a great sound in the fields of medical sciences as general and particularly in urology and nephrology.

MEDLINE³:

MEDLINE (MEDlars onLINE) is the National Library of Medicine's (NLM)⁴ premier bibliographic database covering the fields of medicine, nursing, dentistry, veterinary medicine, the health care system, and the preclinical sciences. The MEDLINE file contains bibliographic citations and author abstracts from approximately 3,900 current biomedical journals published in the United States and 70 countries. The file contains approximately 9 million records dating back to 1966. Coverage is worldwide, but most records are from English-

language sources or have English abstracts. Each MEDLINE record is identified with a unique identifying number called a MEDLINE UID (MUID in PubMed). Citations for MEDLINE are created by the National Library of Medicine, International MEDLARS partners, and cooperating professional organizations. MEDLINE records are incorporated into PubMed weekly, and are also assigned a PubMed unique identifier (PMID).

Many companies offer extracts of MEDLINE data on CD-ROM⁵, such as Knight Ridder, SilverPlatter, Ovid, Cambridge..etc. Each company seems to have chosen its own variation on a theme, so there are a multitude of formats that call themselves "medline". A number of CD-ROM sources offer search software to go with their databases.

Years of Publication:

The yearly number of researches in this study are vary between 23 and 33 researches, the average is about 30 researches every year (total researches before 1992 and after 1998 are not available, so they are neglected in the counts).

Language and Types:

All the mentioned researches are published as journal articles in English language, although some of these articles have been published in some non-spoken English countries like Egypt, Germany, Italy, Japan and etc. Also Journal articles are the main type of all these researches, except a few of them are available in some other types such as clinical trials, randomized

controlled trials, reviews, review literatures, multicenter study and tutorials.

Sources:

All the mentioned researches are published in 87 medical journals from 31 countries including Belgium, Czech Republic, Egypt, England, France, Germany, Greece, Hungary, Ireland, Italy, Japan, Netherlands, Norway, Sweden, Switzerland and United States. Most of the researches are published in J Egypt Soc Parasitol⁶ from Egypt (33 articles), then in Br J Urol from England⁷ (18 articles), then in J Urol⁸ from United States (15 articles). The following Sources' index shows these journals, It's countries, and the reference of the Mansoura university affiliations' articles in each.

Medical Subject categories:

Medical subject categories are used in this study, which shows a priority for urology and nephrology. Medical alphabetic subjects' index shows number of researches in each subject.

Bibliography & Indices:

Bibliographic list of the Mansoura university affiliation's researches in MEDLINE is a part of this study. Each record of the bibliography includes record No., title, author(s), source, language and types. Title's index, author's index, source's index, and subject's index are preceded this bibliography. These indices are referring to the record no. And count of the total.

Cyclosporin in primary haploidentical live-donor kidney transplantation: is it worthwhile?	41
Cyclosporine Neoral in renal transplant recipients: impact on hepatic dysfunction.	195
Cytokeratin shedding in urine as a biological marker for bladder cancer: monoclonal antibody-based evaluation.	30
Cytokines in the vitreous of patients with proliferative diabetic retinopathy.	59
Detection of pregnant women at risk of cervical incompetence by transvaginal sonography during straining.	198
Diagnosis of trypanosomiasis in experimental mice and field-infected camels by detection of antibody to trypanosome tyrosine aminotransferase.	233
Digital subtraction angiography in potential live-kidney donors: a study of 1000 cases.	70
Doppler ultrasonography in evaluation of potential live kidney donors: a prospective study.	135
Dot-ELISA as a diagnostic test in hydatid disease.	62
Double folded rectosigmoid bladder with a new ureterocolic antireflux technique.	154
Effect of allergen-specific immunotherapy on interleukin-4, interleukin-5 and interferon-gamma mRNA expression in the nasal mucosa of rats with allergic rhinitis.	203
Effect of anti-schistosomal treatment on schistosomal hepatic pathology: an experimental study in Syrian golden hamsters.	134
Effect of feed intake and dietary vitamin A levels on sheep performance.	52
Effect of feedborne fluorine intoxication on broiler chicks' performance, biochemistry, physiology and pathology.	50
Effect of gibberellic acid on broiler chickens performance and some metabolic parameters.	108
Effect of sperm viability, plasmalemma integrity, and capacitation on patterns of expression of mannose-binding sites on human sperm.	163
Elevation of glutathione, glutathione-reductase and nucleic acids in both normal tissues and tumour of breast cancer patients.	33
Emphysematous pyelonephritis: a 15-year experience with 20 cases.	159
Endoscopic laser treatment of progressive dysphagia in patients with advanced esophageal carcinoma.	231
Endothelins-induce cyclicAMP formation in the guinea-pig trachea through an ETA receptor- and cyclooxygenase-dependent mechanism.	172
Endourologic management of ureteric complications after live-donor kidney transplantation.	93
Enzymatic properties of lipase and characteristics production by <i>Lactobacillus delbrueckii</i> subsp. <i>bulgaricus</i> .	102
Epidemiological, clinical and laboratory studies on parasitic infections as a cause of fever of undetermined origin in Dakahlia Governorate, Egypt.	200
Epidemiology and control of scabies in an Egyptian village.	218
Ethanol sclerotherapy for symptomatic simple renal cysts.	103
Evaluation of adult <i>Schistosoma mansoni</i> and cercarial antigens in serodiagnosis of schistosomiasis using IHAT and ELISA.	5
Evaluation of beta-endorphin and interleukin-6 in seminal plasma of patients with certain andrological diseases.	127
