An introductory summary of the novel

A mixture of reality and imagination.

The Kingdom of Vera

The first chapter, strange sounds

He hears voices coming from far away Vera ... Vera was not accustomed to hearing it before he came to live in Egypt, he was born and lived in Saudi Arabia.

His father traveled in the forties of the last century. Work near the sanctuary. The grounds of the sanctuary at the time were one of stones. Getting citizenship there was easy. The procedures were simple at the time, and you are on the street.

His father established an office for contracting, then he married, and his wife traveled with him. They had three daughters and two sons, and he bought a building in Egypt and a few acres in Egypt. The two daughters got married in Saudi Arabia to the Saudis, and the third daughter got married to Mizrama, his older son still resides in Saudi Arabia. As for his younger son, he has returned to reside in Egypt.

He loves adventure, he always loves to search for the unknown. He loves traveling, one day he decided to go out with his friends on a mountain walk to explore the caves there. They took their food with them, which is a matter of dried things that may be long stay in the desert. They went to the desert passing between the mountains whenever they saw a cave they were

approaching it and entering it and they find skeletons for birds

approaching one of the caves Vero near them people who have a large electric generator and rockets for cutting and a half-car and a car and cutting The old railroads that stopped working on them, and as soon as they saw him, they started shooting towards him, and he quickly moved the car back, and the jeep moved behind, started chasing him until he reached one of the asphalt roads and fled from it, then the jeep went back to its place

His friends wanted to return, but he refused and insisted on continuing the path in another direction until he reached a cave of wide mouth, whose mouth reached about ten meters, they sat near them and set up their tent, then they went up to the cave, searching it left and right for the skeletons of birds. Meters of a beautiful girl, he and his friends rejoice, call one of the professors of antiquities, Giulio Jia in Alexandria, describing the statue to him, and he tells them that he will come to see him and tell them that they bring drilling equipment in the cave from an electric generator and machines to dig, ropes and electric scouts that he and his colleagues return to their village and prepare for the coming of the doctor From Alexandria two days later, they go to

the cave and the doctor looks at the statue and tells them that he is from the twenty-second family and directs them to dig in front of the feet of the statue

at first. They tried to link the statue and drag it from its place to the car, but they could not move it

They started digging under the statue, the doctor determined the place

for them at the beginning, a solid layer and began to unfold in front of them a circle with a width of three meters after digging to a depth of half a meter.

They dug three meters and did not reach its end.

The doctor decided to return to Alexandria and follow them from there. The doctor told them that this place may be a store of weapons. At that time, the doctor returned to Alexandria and they are still digging. During the excavation, they found something like a dead door with stones.

Call the doctor and tell them that It may be a fake door and directed them to shoot this stone using a gas tube or the so-called Bashboori and after the stone glowed they poured water on it and they crumbled, but they found nothing after this door. It looks like an imaginary door. They called the doctor and told them to continue digging

They dug two more meters, and the depth of the

pit became five meters. They found another door. Call the doctor and tell them that it might be another fake door and he instructed them to do as they did the first time. The result was the same thing as a fake door.

They felt tired and decided to resume work the next day. They went down to the pit with thick ropes with a contract per meter per decade.

Those ropes were well documented outside.

They used light bulbs by operating the generator and were also using it to operate the drilling machines.

They decided to go out of the pit and spend the night at the bottom of the mountain. In front of the cave, they did not sleep all at the same time, but someone who was awake remained afraid of the wolves.

In the morning he and his friends woke up and resumed their work. They went down about another meter, the depth of the pit became six meters. They found another door. They called the doctor and told them to do as they did the first time. They brought his stove tube and the Bashbouri and heated the stones that blocked that door until it turned red so they poured water on it. The stones of the blocked door started to crack, wait for it to cool, bring the hammer began to crumble in the stone until it was finished, and

was surprised by a lot of fine sand that was poured out. Three meters inside the door, this was another crypt in the other direction, leading them to another cave in the mountain from the inside.

Another cave is smaller than the first, the size of its nozzle reaches four meters. They entered the second cave. They explored it and found a statue similar to the first, about two meters long.

They got out of the cave and called the doctor, so he told them to wait another three days without work. It seemed that the doctor had feared them of getting some air pollution or wanted to renew the air inside the cave, although he did not have any mummies or any traces of the dead. They decided to return to Their country, after the three days had passed, they came back again. The doctor told them to dig in front of this for the last statue and do what they did in the first statue.

They dug in front of this statue.

Meanwhile the doctor came and found written on the statue the Queen Vera of the Greeks.

The doctor ordered them to dig in front of the statue

They dug a and found the same hole about three meters wide, from which they took out the sand, they drilled to the depth of a meter, and they

found a blocked door in the meantime. The doctor decided to return to Alexandria. They are still in the excavation work. They went down two more meters and found a door that they broke, so it turned out that it was an illusory door that the doctor had told them that they would find a sign that indicated them on the right path. Down five meters. Their total descent into the belly of the mountain was about eleven meters.

They are still searching for the indication that the doctor told them about. The doctor had told them that they might find a stone with an arrow that would show them the right place and they should take care to change the direction of the arrow from its position.

One of them was holding a drilling machine and burned, so he decided to do the drilling with another machine instead of him, while he took down the drilling machine and took it out. A stone with an arrow on it appeared to have changed from his place. It was the stone that the doctor told him an arrow marked unfortunately. His direction and location changed due to its movement. With a drilling machine without awareness of them.

They went out and called the doctor. One of the people replied that he was one of the relatives of the doctor. He thought that this connection to the

condolence on the death of the doctor was condoled by the relative of the doctor. He returned to the cave down to the last pothole, beating the hammer right and left and down from it.

They rushed up to the top and returned to their town. A week later they decided to return again, but this time with a person they called a sheikh who reached the cave. This person entered the cave and looked at the statue and took a lot of fatwas. He looked like this and in such a case it will be such and suddenly he looked at the statue and said to them Her eyes are looking towards the right. Toward the room and her summer house they broke inside the cave towards the right and left the excavation work. Then the Sheikh reads incomprehensible words and then stops and started to break on the right side opposite the eye of the statue, and during their cracking the stone began to fall inside and outside the cave so they hurriedly came out and said The Sheikh told them that this place has a great monitoring and did not advise them to stay in it, so the end of one of them may be in this place and the Sheikh came out and they all returned with him to their towns.

After about a week, they met and consulted to

resume work in the last hole

They traveled until they reached the cave. He had a ring with him that had fallen from it in the last hole. During his descent, he found a small fire anthrax approaching from his eyes and heard voices saying Vera Vera so he cried, but his friends did not believe what he saw but saw nothing and did not hear anything. He found his ring and took the ring into a small stone in His hand hit the hammer in the wall of the pit, and he heard many voices saying, "Vera ... Vera asked for a speedy exit, and his friends were surprised, so they all came out behind him. It seems that it is only he who heard these voices, they went down the mountain."

At night, he heard many voices howling wolves, and he asked his friends to sleep in the cave from the bottom of the mountain.

They went to sleep in the cave, whose mouth was about ten meters. His friends slept and he, as he woke up to a voice saying Vera, looks at the crater of the cave and finds a black person looking at him with a width of his face five meters long and holding in his hand a long, twisted, huge stick that extended his hand to him His legacy falls and he finds himself in a dark place with severe dust and winds

I am Asturai ... oh ... he

is: you know

me, Asturai: Yes, I know you and know the truth
of each of these statues and you will turn into a
statue and be placed here to stop your mind

is: How is that?

Asturai: These statues are for people whose
minds have stopped for
a moment. It is: You told me that you know the
truth of each of these statues, so what is the truth
about the statue of this girl?

Asturai: He is a girl. Her mother died at the time,
she was five years old, he married her father to
another, but she did not compensate her for the
tenderness of her mother and she treated her
harshly. She was preparing food for him, and he
stirred up against her. She held a knife to
prepare food for him. He tried to take the knife
from her, but she was afraid of killing her, and
she held onto the knife, while he was trying to

extract the knife from her hands, because with the knife, he cut the arteries of his hand, and the speeder came out with her, and her child left him to bleed and he died.

It is: What is her name?

Asturai: Her name

is Clara : And then what?

Asturai: Look in my eyes,

he is: He looks in his eyes, and he sees a fearful girl shivering in the darkness of the night, riding a horse and speeding out, and with her a small child migrating from the town, arriving to another town that borders her, so he stays for a long time at the edge of the road, and a young man looks at her and approaches her

Young man: I, Achilles, do not work near here.

Do you want to help?

CLARA: No thanks ... I'm waiting for a friend who will come to take me with her, because I'm not from this town

Achilles: If you need an assistant, I am here and then leave her and sit alone away from her, but he continues to follow her and looks at it.

A group of young people comes and talks to her, then leaves her, and Achilles goes to her.

Achilles: It's been a long time, and your girlfriend hasn't come yet. Do you want to help?

CLARA: Actually, I got married to an elderly man,

so he died, and he had children from another woman. They expelled me and my child, and we do not have the shelter of my brothers. What do you think about marrying me when I was thirty-five ?

Achilles: I did not marry..I receive a weak wage, but I have a small house in Podsta where my mother lives. Do you travel with me to Podsta?

Clara: Yes, I travel with you, but what will you say to your mother?

Achilles: I will tell her that we got married

Clara: She thinks and is convinced of the idea of Achilles and agrees to go with him to Podsta

Achilles: It seems to me that you have not yet eaten .. He goes and buys food and sits together until the morning at the edge of the river.

In the morning he rides his horse and goes with him on her horse until they reach Podsta.

And here Asturian closes his eyes

is: Let me see what happened.

Asturai: Not now, I go to sleep,

he: goes to sleep, but does not feel comfortable in his sleep, as he used to sleep on one side, so the place where he sleeps is very tight.

As for his food, it was three small pieces of bread that did not exceed the palm of the hand, a quarter of a small cup of beans, a few pieces of

rice, a small piece of cheese, half a tomato and fruit and an onion that he shared with four individuals. This was his daily food in addition to four eggs and two small pieces of meat Weekly. He was sharing with a group of those present with him in the same room about four individuals and the number of those present in the room was about forty individuals and the custom area is forty meters, including a place dedicated to preparing food and a place for showering. The place where the food was prepared was by the system of each group of forty having its role the largest group first and the smaller groups after it.

As for showering, so is everyone waiting for his turn, and no one should move in the room and drop a drop of water after him bathing. Maybe he will fall on the bed of someone in the room, or fall on him personally while he is asleep so wake him up and cause his nervousness.

Likewise, washing dishes and clothes inside the room was a system that has a role. No one puts his clothes on someone's clothes for fear of transmitting the infection, which was often a skin disease caused by a lack of exposure to sunlight. As for the currency, it was the tobacco. The rich person is the one who owns more tobacco. Someone wants to get this tobacco by washing

clothes or utensils, cleaning the room, distributing food, or working in the bakery or the kitchen. He sees in the palace people who have been afflicted with many diseases, especially skin diseases, but no matter how he tries to get away from them, he is destined to have ulcers in his hands and legs so the doctor comes to him and gives him some medication and he will be cured.

The palace has an office that no one enters and does not care about, just as the guards do not allow anyone to go to it except on official occasions like Independence Day and the Queen ascends the throne of Vera.

In the kingdom of Vera, there are more than fifty feasts and holidays for work. In the kingdom of Vera, one person works and ten do not find work.

The

Kingdom of Vera was one of the strongest kingdoms and armies, but today its guards oppress the people and abound in tax collection

Chapter Three

Podsta

He looks in the eyes of Asturai ... and he sees Clara and Achilles

reach the Podsta, and they get married. Days pass by and her child can no longer tolerate that naughty child, who was often having fun and wakes him from his naps.

Achilles: He plays a lot and does not let me sleep.

Clara: I want to return to the city of Mira. It is better for this child to live with his brothers.

Achilles: I will find out for you.

Clara: I go to Luna, one of my relatives who lives miles away from Mira.

In the morning his horse rides and heads towards Mira.

On the outskirts of Mira Yu, one of the guards stood

guard. Where are you going?

My brothers: To Luna's house, I was told that on the outskirts of Mira, the

guard: Where are you coming from?

Achilles: I am coming from the city of Podsta.

Sentinel: What do you want from Luna?

Achilles: You sent Clara to me.

The guard: Clara is

killing her husband, accompanied by her

lover, Achilles: No .. No, I don't know anything about what the

guard says : That is the house of Luna,
Achilles: Thank you..He heads towards Luna's
house and

knocks on the door, so Achilles opens it to him : I
Achilles is coming from the town of Podsta, and
Clara

Luna has sent me to you : We do not know
anything about her and she does not come to us
again and closes the door.

Achiolis thinks a lot about it, then he rushes back
to Podsta and the guards follow him. Achilles
arrives at his house

: they accuse you in Mira of killing your husband
with the help of your lover

Clara: I quarreled with me and I prepared food for
him. Try to take the knife from me and I hurt him
in his hand.

Achilles: For feet. Meanwhile, knocks are heard
at the door.

Achilles: He opens the door and closes it quickly
.. They are Mira guards and escapes from a
back door to the house.

He sits sad and lengthens the thinking,

Asturai. What

is wrong with you? I think about my wife and my
children, Asturai. Look in my eyes to see his wife
sitting on the bed and smell from the room in
which he smells good and sees his children go

with their grandfather and buys them what they want and runs their affairs.

Asturay did not mix with many of the people in the palace thinking and looking in the eyes of Asturai. He saw a little boy sitting next to his uncle and buying him toys like a little horse doll to play with.

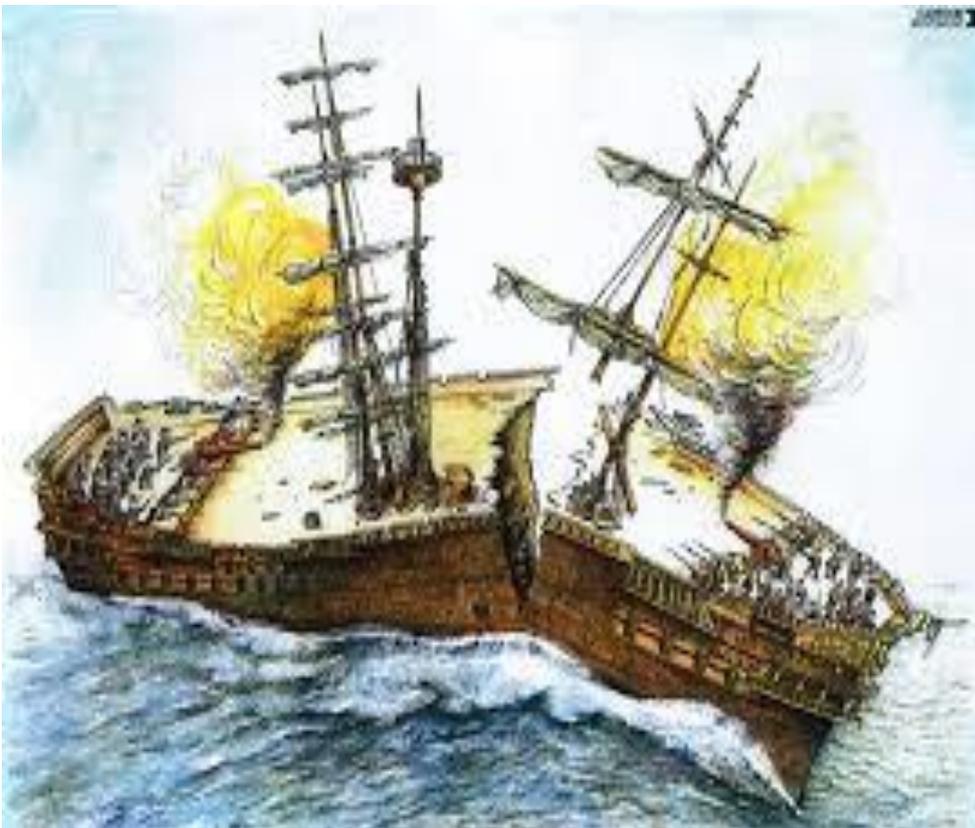

He sees his grandmother feeding him when he is young and tells him every day a story he hears and then sleeps.

Days and years passed, and one day he woke up from his sleep, and he felt severe blows in his heart that were repeated with him every day.

He looked into the eyes of Asturai and found his father going through a healthy illness and then dying. He saw his little child crying and running behind his grandfather's funeral, and then he goes every day with his young cousins to visit his grandfather's grave, but Asturai hone it, so this is the truth. Death is inevitable.
