

Censorship Agreement on the management of Endowment (Waqf) in Saudi Arabia (Scientific endowment in the king Abdul Aziz University) As A model
A publication issued by Sae Foundation for the Development of Waqfs(8)

Prepared By: Mr. Ahmed bin Mohammed Abdullah Al-Shanqeeti

Origin of the book is: A Research presented to complete the requirements for obtaining Master Degree in private law At Arab Oriental for higher Graduate Colleges - Law Department - Riyadh

This research begins with an introduction containing the research problem and the question about the importance of a Supervision Convention body appointed by the endower or by objective observation: the judge or super intender)to be ratified by judge)to monitors the work of Superintendent board, and this happened because of the loss of Endowment (Awqaf) and corruption. The introduction also provided with the importance of scientific research and the need of the endowers for such a method to manage the endowments.

After that we see Preliminary Study contains a definition of endowment, its legitimacy, the conditions, means of endowment management, the role of the Superintendent board and an agreement censorship which is about Association monitors the work of the Superintendent board and is responsible for supervising and oversight functions provided that not to disrupt the judicial oversight work or irregular from the highest authority.

Rooting Superintendent ruling on Endowment:

This research summaries that the ruling on endowment and administration associated with interest and that the condition of the endower to General Assembly administered makes her control in the context of the specific jurisdiction of standing of the endower like what happens in the case of the Superintendent board depending on the specific terms specified by the Endower.

In the first chapter, we find the formation of a censorship agreement and the Superintendence board and the terms of reference and how to create a

Superintendent board through the censorship agreement body.

The bottom line of the first chapter that the censorship agreement is a type of accepted conditions of the Endowers, and may be done through the concerned judge and super attender after the ratification of judge.

In the second chapter has been reviewed scientific endowment experience at King Abdul Aziz University and a summary chapter shows the study of model-based control agreement device on the work of the Superintendent board, a scientific endowment at King Abdul Aziz University in Jeddah through studying the endowment deed and its internal regulations which

Applied case has been linked to the theoretical rooted situation which appeared in the end that the scientific endowment at King Abdul Aziz University has established a solid way and he's better than the case of many other endowments.

One of the main search results

The control method Convention is not commensurate with all endowment foundations, especially small and simple Endowments.

Of the most important recommendations: the need to accommodate the competent judicial bodies to establish endowments through censorship Convention, style and doctrinal prepared and disciplined properly in order to avoid the cessation of falling into difficulties to convince the judge.
