-This story is literary and is not considered a medical diagnosis.

Adam and Robo are friends, both lives in the Flowers Tower in the Joy city. Adam resides on the seventh floor, while Robo works as an Electronic Teacher in a Robotics Lab on the tenth floor.

When Adam and Robo meet, they talk about many things like reading, sports and music. But this time, they talked about the Coronavirus that swept the city and many countries in the world. This virus causes illnesses such as the common cold and severe acute respiratory syndrome (SARS), and it may also cause death.

Workers sanitize streets, benches, trees, roofs, doors and windows, to prevent and stop spreading the virus, to preserve human health.

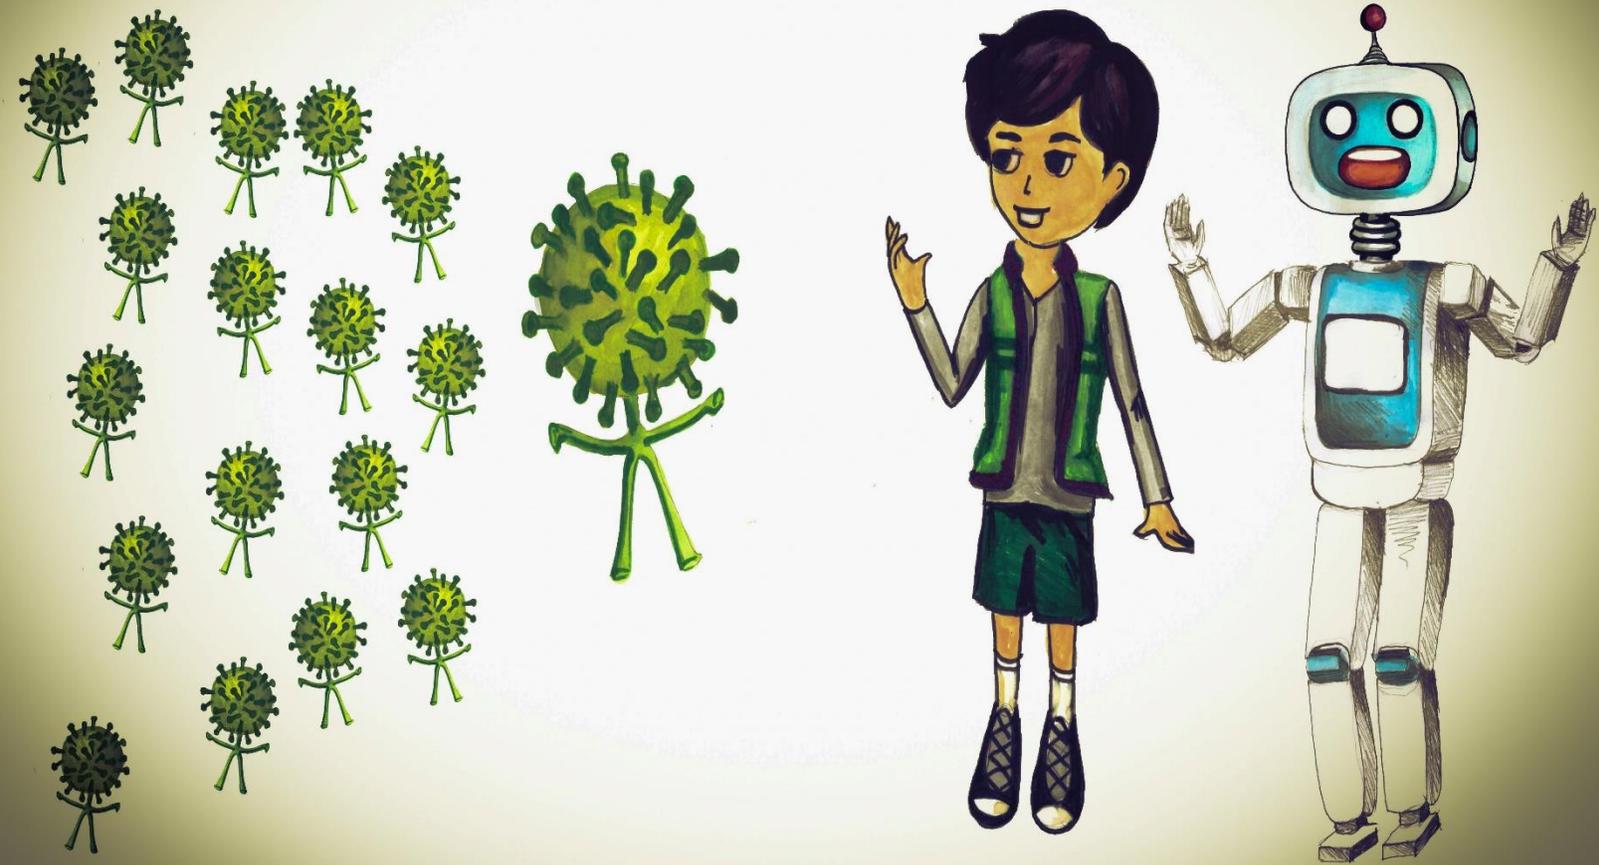

Adam asked Robo: Is there a solution to stop this virus that destroys people's lives, restricts their daily activities such as sales and purchases, walking in parks, and prevents going to theaters, restaurants, and even travelling.

Robo replied: There is no solution yet.

Adam said: How? it is a virus like influenza, right?

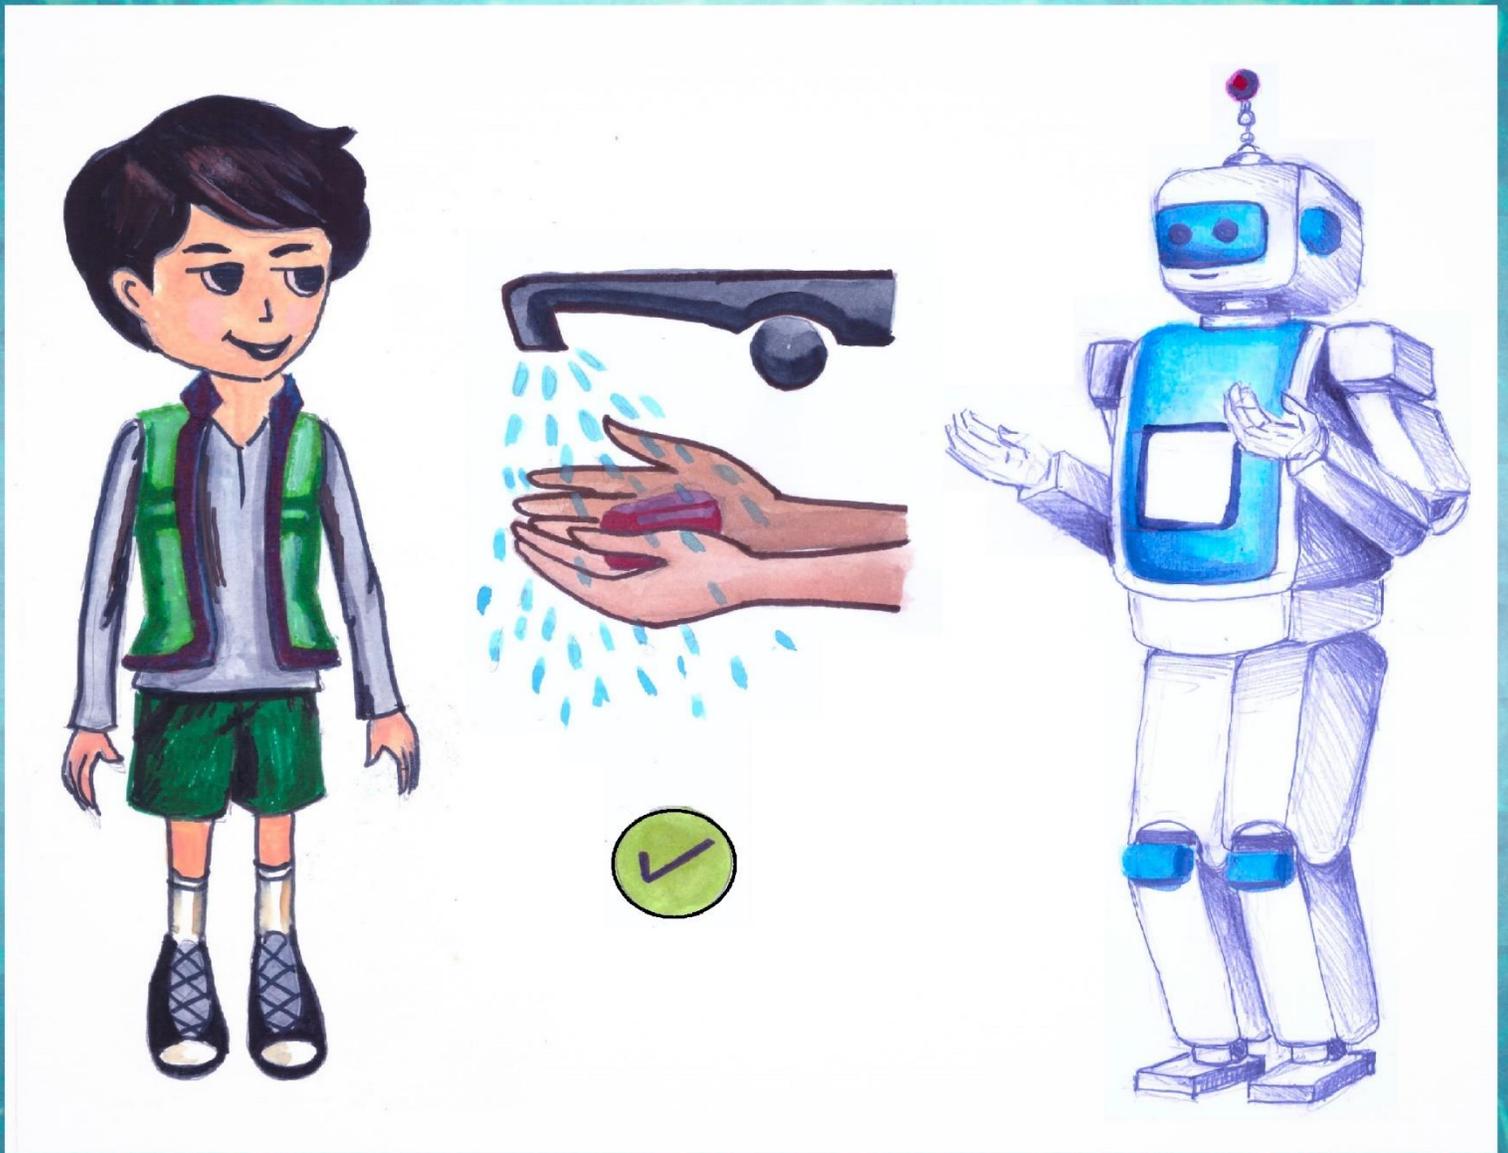

Robo said: No, it isn't like influenza, it is different, and its new, so scientists and doctors are working hard in laboratories to discover the vaccine for this virus.

Adam said: Scientists are still working, so how will we win this battle?

Robo said: We will win through recommendations that will blockade the virus and prevent its spread.

Adam asked: But what are the ways to prevent this virus from spreading?

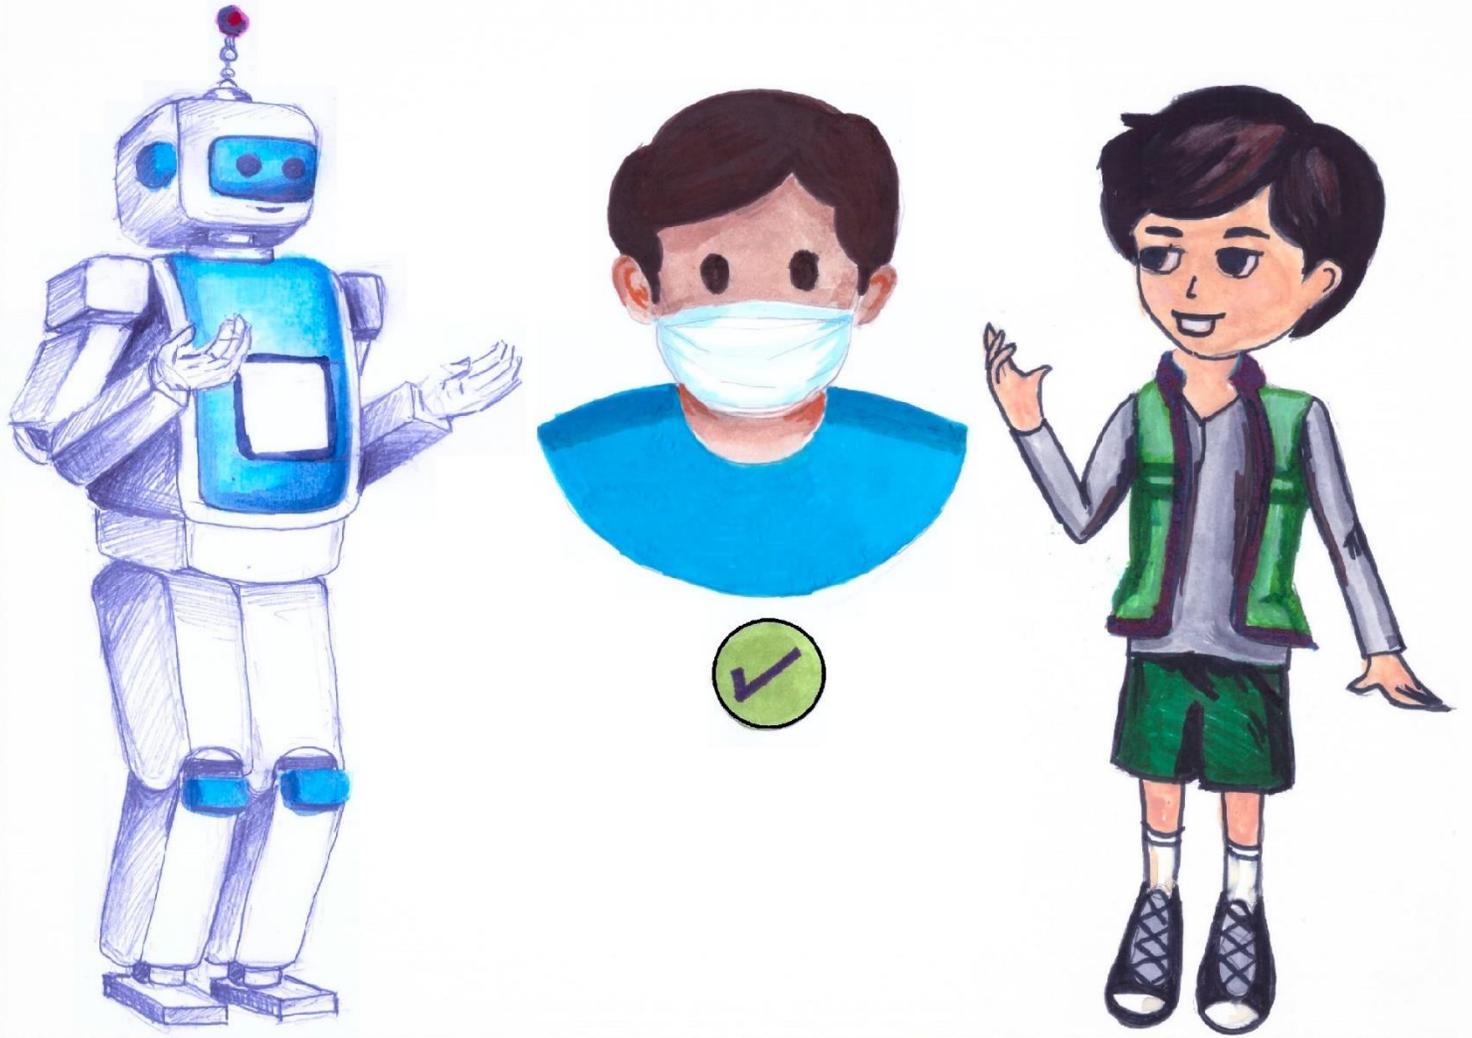

Robo said: This is a good question, Adam, there are multiple ways to prevent coronavirus, because we must keep ourselves healthy. It is necessary to wash hands with soap and water thoroughly for at least twenty seconds.

Adam said: Is there anything else?

Robo answered: yes, don't shake hands, don't kiss while greeting, and when talking to other people there keep an appropriate distance, and use tissues when sneezing.

Adam asked: And if there are interactions with people who have a cold or flu, what should we do?

Robo said: We can use nose and mouth mask, and there is also something important

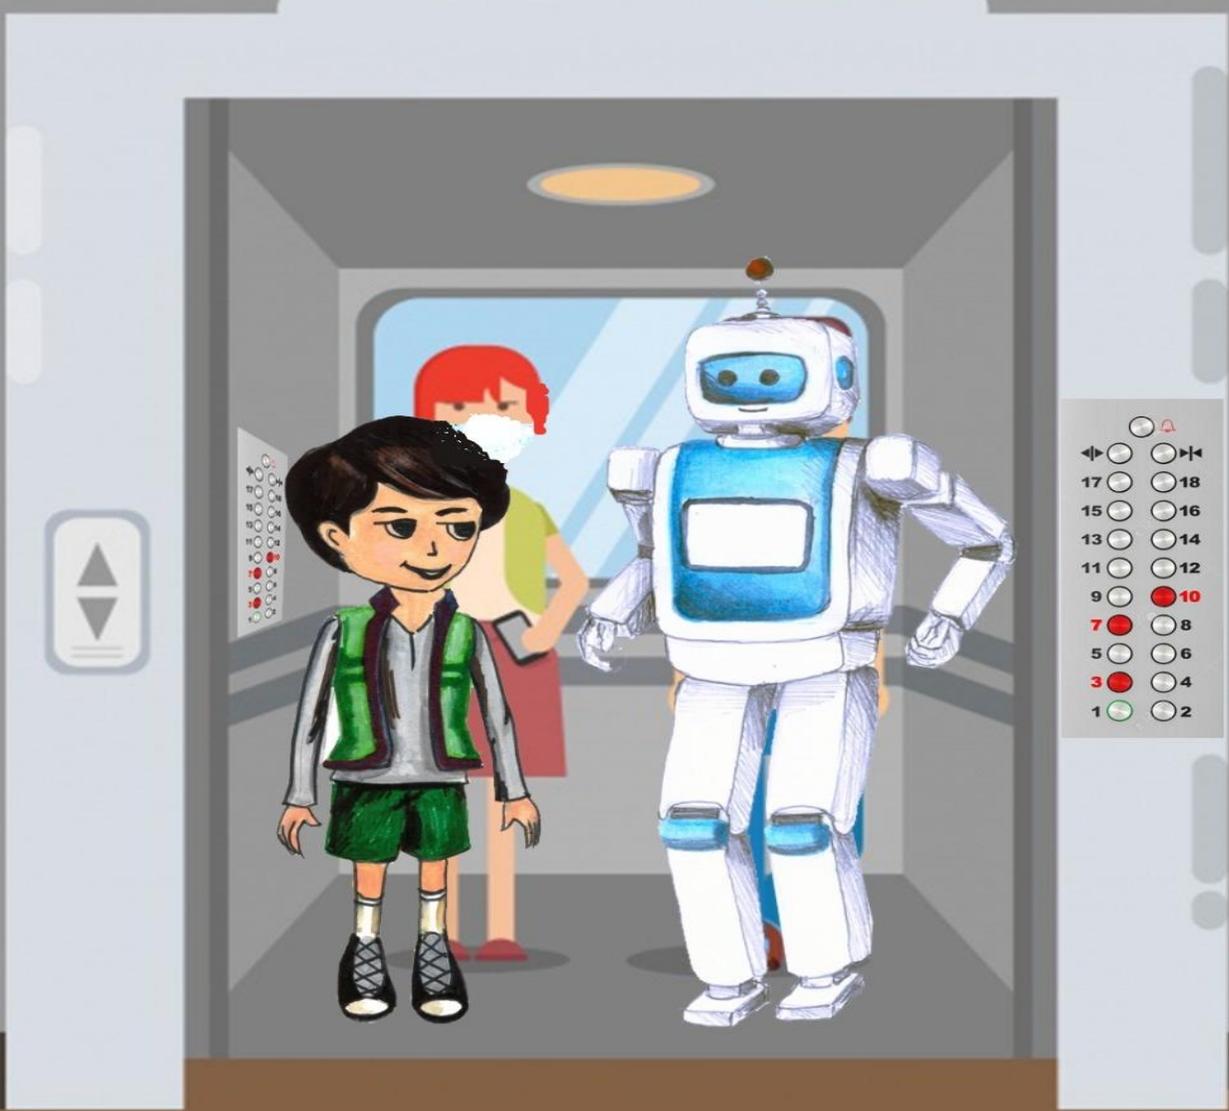

Adam said: What is it?

Robo said: You must eat well, do exercise, think orderly, and smile, which can strengthen the body's immunity, so we can have victory over this virus, and face any difficulties in the path of life, to achieve success in the present and future.

Adam said: Not only that, Robo, but we will also win through music. Please announce in your lecture that the Joyful City Orchestra will play Beethoven's Symphony 9 online at 8 pm today, and of course without an audience. My family and I will listen to Symphony after completing my homework. Robo said: This is beautiful, of course I will.

Adam said: I am happy to discuss this with you Robo and thank you for your valuable information.

Robo said: This is my duty, Adam. And excuse me, I must go now to give my online lecture to spread awareness about the Coronavirus.

Adam said: Okay, and I will go to my apartment, and I will tell my friends to watch your lecture to understand the instructions and benefit from them. And Robo ... do not forget Beethoven.

Robo said: Of course, I will not forget, it is time for teamwork.

Adam said: At this time, despite the different cultures between us, cooperation is important to win this battle against the virus and preserve our health.

Robo said: You really must pay attention to the quality of people's life.

Adam said: Yes, to help the sick to be healthy, the illiterate to be educated, and the poor to be rich, for the happiness of humanity. We live in one world.
