Hossam and Robo are friends, each of whom lives in Flowers Tower on Nile Street, in Cairo. Hossam resides on the seventh floor, while Robo works in the Robotics Lab on the tenth floor.

When Hossam meets with Robo in front of the door of the Tower or inside the elevator, they are talking about many things, such as reading, sports and music.

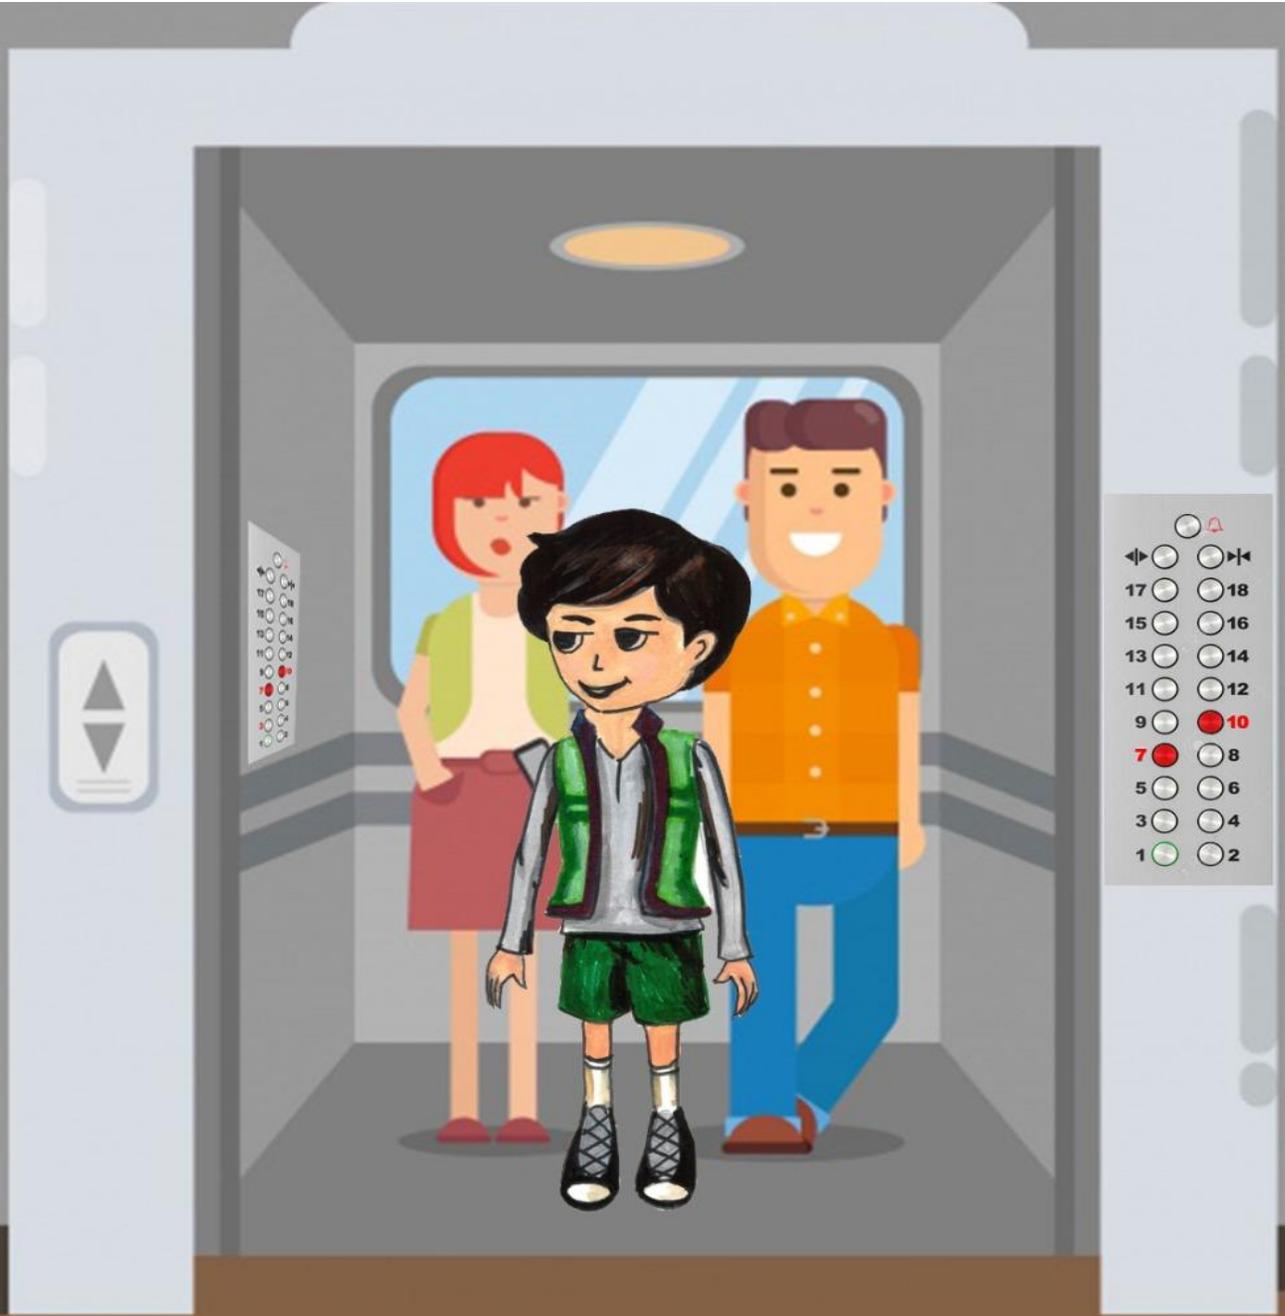

The elevator stopped on the third floor, and suddenly Robo, went out quickly.

Hossam wondered about this situation, and he said to himself, given that Robo is working on the tenth floor, so why is he going down to the third floor?

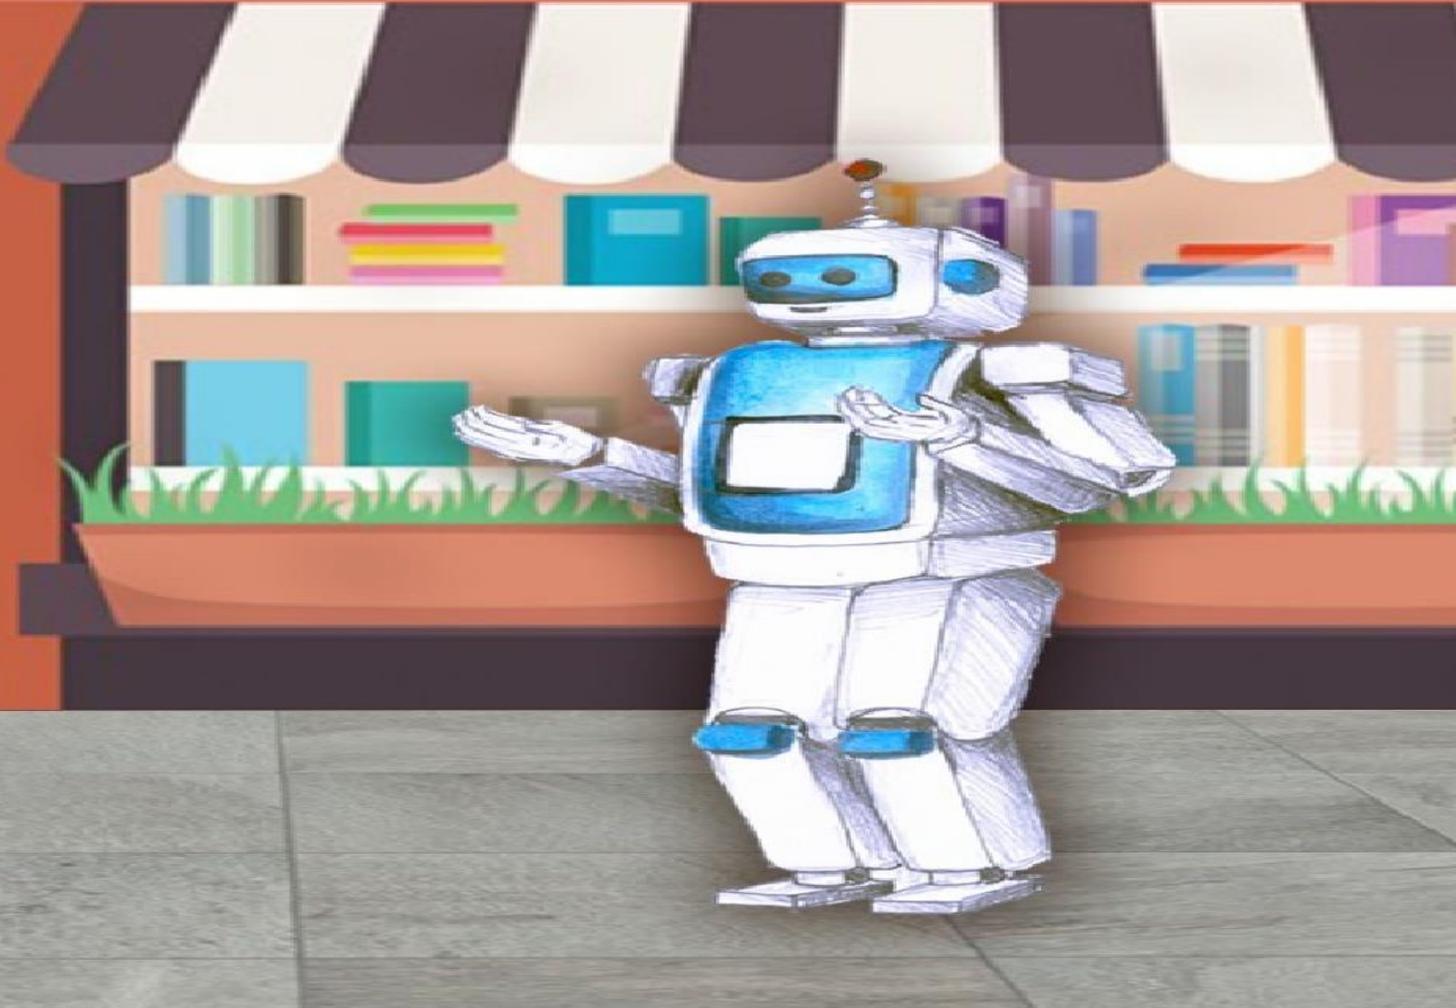

Hossam said maybe Robo wants to buy some flowers from the third-floor store. Robo once told me that he loves the colors of flowers. Yes, beautiful flowers make a person happy and help people to do their work perfectly.

While the elevator moved to the seventh floor, where Hossam's apartment is, Hossam kept thinking, why did Robo go down to the third floor?

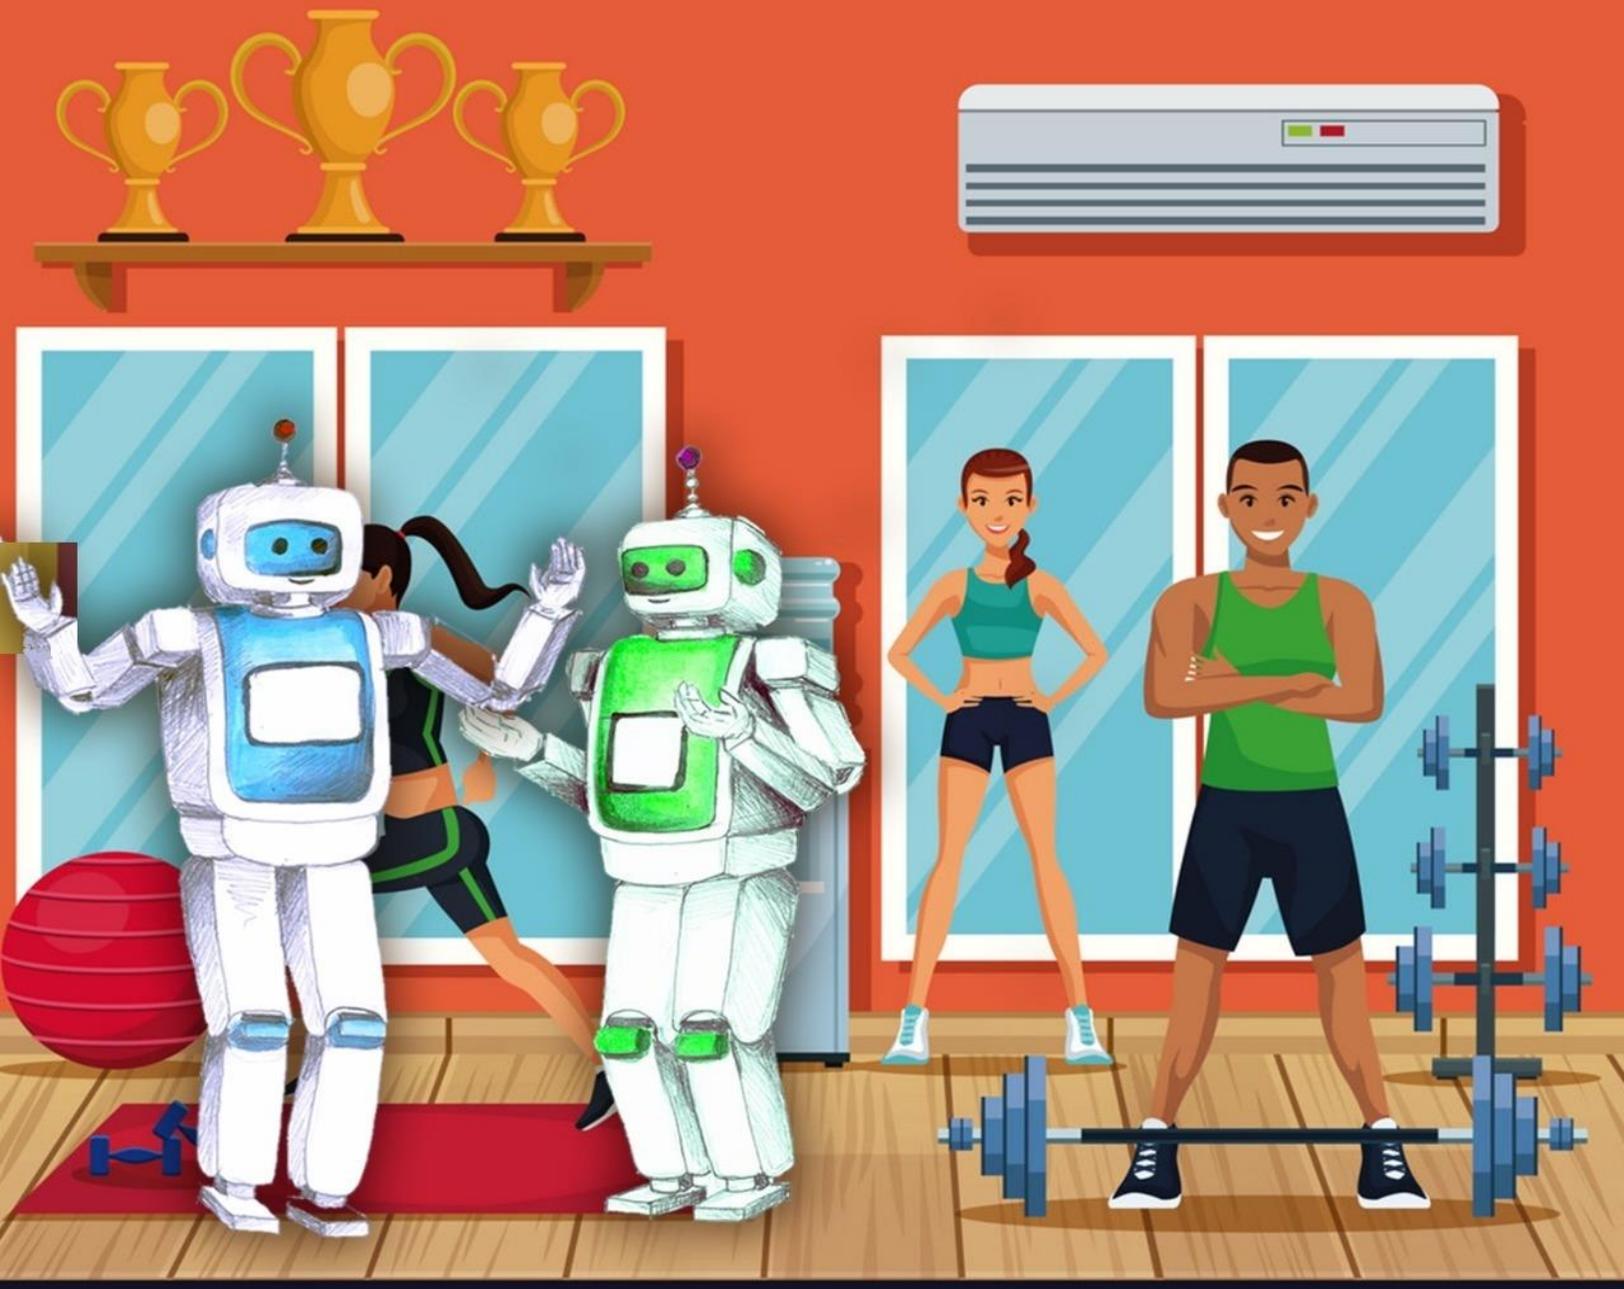

BOOK ST

Hossam said to himself: Robo would probably want to go to the bookstore to buy the story "The struggle of Thebes" written by Naguib Mahfouz, the Egyptian author who got the Nobel Prize in literature. Robo told Hossam, once, that he liked to read Mahfouz's stories, the plays of Shakespeare, and the science fiction novels of Jules Verne.

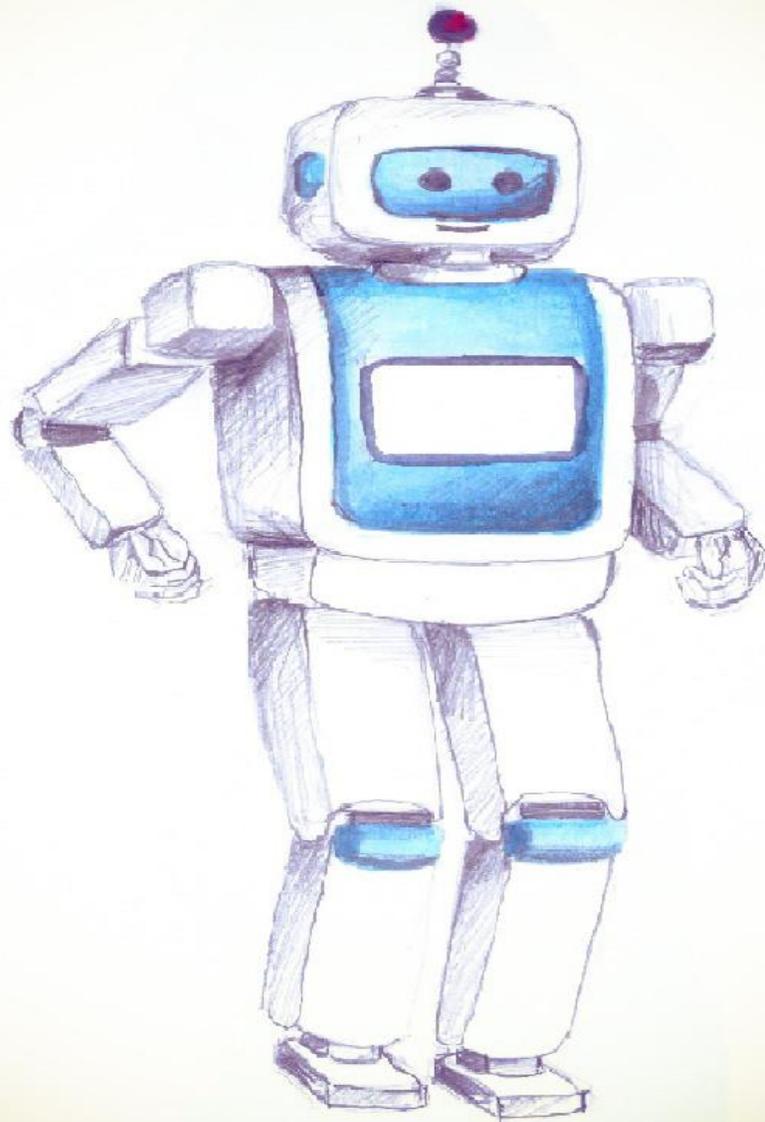

Hossam is still thinking, why is Robo going to the third floor?
While he works in the Robotics Lab on the tenth floor.

Maybe, Robo went to his friend in the Gym to ask about him and encourage young people to master the sports training. Robo spoke to Hossam about the lectures that he attended about the benefits of sports for the human body. In fact, sports make us achieve our work easily and with high efficiency, and this helps to develop ourselves for the better.

Hossam reached the seventh floor, but he still did not know why Robo went to the third floor.

Do you know my dear friend? Let's think:

Maybe Robo went to

or.....

or.....
