

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
1. Venice 2003 classification of congenital systemic to pulmonary shunts associated with pulmonary hypertension.	3
2. Update of the Venice 2003 classification.	4
3. Updated Classification of Pulmonary Hypertension.	7
4. Age in the two studied groups (months).	38
5. Sex in the two studied groups (M/F).	39
6. Body weight in the two studied groups (kgs).	40
7. Heart rate changes in group I (beats/min).	43
8. Heart rate changes in group II (beats/min).	44
9. Heart rate changes in the two studied groups (beats/min).	45
10. Systolic arterial blood pressure changes in Group I (mmHg)	47
11. Systolic arterial blood pressure changes in Group II (mmHg).	48
12. Systolic arterial blood pressure changes in the two studied groups (mmHg).	49
13. Diastolic arterial blood pressure changes in Group I (mmHg).	51
14. Diastolic arterial blood pressure changes in Group II (mmHg).	52
15. Diastolic arterial blood pressure changes in the two studied groups (mmHg).	53
16. Mean arterial blood pressure changes in Group I (mmHg).	55
17. Mean arterial blood pressure changes in Group II (mmHg).	56
18. Mean arterial blood pressure changes in the two studied groups (mmHg).	57
19. Systolic pulmonary arterial blood pressure changes in Group I (mmHg).	59
20. Systolic pulmonary arterial blood pressure changes in Group II (mmHg).	60
21. Systolic pulmonary arterial blood pressure changes in the two studied groups (mmHg).	61
22. Diastolic pulmonary arterial blood pressure changes in Group I (mmHg).	63
23. Diastolic pulmonary arterial blood pressure changes in Group II (mmHg)	64
24. Diastolic pulmonary arterial blood pressure changes in the two studied groups (mmHg).	65
25. Mean pulmonary arterial blood pressure changes in Group I (mmHg).	67
26. Mean pulmonary arterial blood pressure changes in Group II (mmHg).	68
27. Mean pulmonary arterial blood pressure changes in the two studied groups (mmHg).	69
28. Superior vena cava oxygen saturation changes in Group I (%).	71
29. Superior vena cava oxygen saturation changes in Group II (%).	72

<b>Table</b>	<b>Page</b>
30. Superior vena cava oxygen saturation changes in the two studied groups (%).	73
31. Pulmonary artery oxygen saturation changes in Group I (%).	75
32. Pulmonary artery oxygen saturation changes in Group II (%).	76
33. Pulmonary artery oxygen saturation changes in the two studied groups (%).	77
34. Femoral artery oxygen saturation changes in Group I (%).	79
35. Femoral artery oxygen saturation changes in Group II (%).	80
36. Femoral artery oxygen saturation changes in the two studied groups (%).	81
37. Superior vena cava partial pressure of oxygen changes in Group I (mmHg).	83
38. Superior vena cava partial pressure of oxygen changes in Group II (mmHg).	84
39. Superior vena cava partial pressure of oxygen changes in the two studied groups (mmHg).	85
40. Pulmonary artery partial pressure of oxygen changes in Group I (mmHg).	87
41. Pulmonary artery partial pressure of oxygen changes in Group II (mmHg).	88
42. Pulmonary artery partial pressure of oxygen changes in the two studied groups (mmHg).	89
43. Femoral artery partial pressure of oxygen changes in Group I (mmHg).	91
44. Femoral artery partial pressure of oxygen changes in Group II (mmHg).	92
45. Femoral artery partial pressure of oxygen changes in the two studied groups (mmHg).	93
46. Pulmonary vascular resistance index changes in Group I ( $\text{dyn.s}^1/\text{cm}^5/\text{m}^2$ ).	95
47. Pulmonary vascular resistance index changes in Group II ( $\text{dyn.s}^1/\text{cm}^5/\text{m}^2$ ).	96
48. Pulmonary vascular resistance index changes in the two studied groups ( $\text{dyn.s}^1/\text{cm}^5/\text{m}^2$ ).	97
49. Systemic vascular resistance index changes in Group I ( $\text{dyn.s}^1/\text{cm}^5/\text{m}^2$ ).	99
50. Systemic vascular resistance index changes in Group II ( $\text{dyn.s}^1/\text{cm}^5/\text{m}^2$ ).	100
51. Systemic vascular resistance index changes in the two studied groups ( $\text{dyn.s}^1/\text{cm}^5/\text{m}^2$ ).	101
52. Pulmonary to systemic blood flow ratio changes in Group I.	103
53. Pulmonary to systemic blood flow ratio changes in Group II.	104
54. Pulmonary to systemic blood flow ratio changes in the two studied groups.	105

## LIST OF FIGURES

<b>Figure</b>	<b>Page</b>
1. Congenital Heart Disease Classification.	2
2. Schematic representation of the pathophysiological events contributing to the development of sustained pulmonary vascular resistance and pulmonary arterial pressure.	6
3. Pulmonary hypertension results in a “vicious circle” of right ventricular failure.	9
4. Age in the two studied groups (months).	41
5. Sex in the two studied groups (M/F).	41
6. Body weight in the two studied groups (kgs).	41
7. Heart rate changes in the two studied groups (beats/min).	45
8. Systolic arterial blood pressure changes in the two studied groups (mmHg).	49
9. Diastolic arterial blood pressure changes in the two studied groups (mmHg).	53
10. Mean arterial blood pressure changes in the two studied groups (mmHg).	57
11. Systolic pulmonary arterial blood pressure changes in the two studied groups (mmHg).	61
12. Diastolic pulmonary arterial blood pressure changes in the two studied groups (mmHg).	65
13. Mean pulmonary arterial blood pressure changes in the two studied groups (mmHg).	69
14. Superior vena cava oxygen saturation changes in the two studied groups (%).	73
15. Pulmonary artery oxygen saturation changes in the two studied groups (%).	77
16. Femoral artery oxygen saturation changes in the two studied groups (%).	81
17. Superior vena cava partial pressure of oxygen changes in the two studied groups (mmHg).	85

<b>Figure</b>		<b>Page</b>
18.	Pulmonary artery partial pressure of oxygen changes in the two studied groups (mmHg).	<b>89</b>
19.	Femoral artery partial pressure of oxygen changes in the two studied groups (mmHg).	<b>93</b>
20.	Pulmonary vascular resistance index changes in the two studied groups (dyn.s <sup>1</sup> /cm <sup>5</sup> /m <sup>2</sup> ).	<b>97</b>
21.	Systemic vascular resistance index changes in the two studied groups (dyn.s <sup>1</sup> /cm <sup>5</sup> /m <sup>2</sup> ).	<b>101</b>
22.	Pulmonary to systemic blood flow ratio changes in the two studied groups.	<b>105</b>

# LIST OF ABBREVIATIONS

## Abbreviation

---

<b>ASD</b>	Atrial septal defect
<b>AVSD</b>	Atrioventricular septal defects
<b>cAMP</b>	Cyclic adenosine monophosphate
<b>CBC</b>	Complete blood picture
<b>cGMP</b>	Cyclic guanosine monophosphate
<b>CI</b>	Cardiac index
<b>COA</b>	Coarctation of aorta
<b>CTPA</b>	CT pulmonary angiography
<b>ERA</b>	Endothelin receptor A antagonist
<b>FDA</b>	Food and drug administration
<b>NO</b>	Nitric oxide
<b>PAH</b>	Pulmonary arterial hypertension
<b>PDA</b>	Patent ductus arteriosus
<b>PVR</b>	Pulmonary vascular resistance
<b>SVR</b>	Systemic vascular resistance
<b>TAPVR</b>	Total anomalous pulmonary venous return
<b>TGA</b>	Transposition of great arteries
<b>TOF</b>	Tetralogy of fallot
<b>VSD</b>	Ventricular septal defect
