

LIST OF FIGURES

Figure		Page
(1)	Transabdominal US image of a transverse view of normal prostate.	22
(2)	Transabdominal US image of a sagittal view of enlarged prostate.	22
(3)	Determination of the prostate size using transabdominal US.	23
(4)	Distribution of the studied cases according to age.	24
(5)	Body mass index (BMI) of all patients in the study.	25
(6)	Duration of diabetes mellitus (DM) treatment.	26
(7)	Distribution of the studied cases according to PSA.	27
(8)	Comparison between the two studied groups according to PSA with a cut-off value: 4 ng/ml.	28
(9)	Distribution of the studied cases according to testosterone.	29
(10)	Distribution of the studied cases according to PSA density.	31
(11)	Comparison between the two studied groups according to PSA density with a cut-off value: 0.15 ng/ml/cm ³ .	33
(12)	Correlation between duration of treatment of DM with FBG in diabetic group.	35
(13)	Correlation between duration of treatment of DM with HbA1c in diabetic group.	35
(14)	Correlation between duration of treatment of DM with PSA in diabetic group.	36
(15)	Correlation between duration of treatment of DM with testosterone in diabetic group.	36
(16)	Correlation between duration of treatment of DM with prostate volume in diabetic group.	37
(17)	Correlation between duration of treatment of DM with PSA density in diabetic group.	37
(18)	Correlation between BMI with FBG in diabetics group.	39
(19)	Correlation between BMI with PSA in diabetics group.	40
(20)	Correlation between BMI with PSA in non-diabetics group.	40
(21)	Correlation between BMI with PSA in each group.	41
(22)	Correlation between BMI with Testosterone in diabetics group.	41
(23)	Correlation between BMI with Testosterone in non-diabetics group.	42
(24)	Correlation between BMI with Testosterone in each group.	42
(25)	Correlation between BMI with prostate volume in diabetics group.	43

Figure		Page
(26)	Correlation between BMI with prostate volume in non-diabetics group.	43
(27)	Correlation between BMI with prostate volume in each group.	44
(28)	Correlation between BMI with PSA density in diabetics group.	44
(29)	Correlation between BMI with PSA density in non-diabetics group.	45
(30)	Correlation between BMI with PSA density in each group.	45
(31)	Correlation between PSA density with serum testosterone in diabetic group	46
(32)	Correlation between PSA density with serum testosterone in non-diabetic group.	47
(33)	Correlation between PSA density with serum testosterone in each group.	47

LIST OF ABBREVIATIONS

LKB1	: Liver kinase b 1
BMI	: Body Mass Index
BPH	: Benign Prostatic Hyperplasia
DRE	: Digital Rectal Examination
RR	: Relative risk
HCC	: Hepatocellular carcinoma
FSH	: Follicle-Stimulating Hormone
GnRH	: Gonadotropin-Releasing Hormone
NAFLD	: Nonalcoholic fatty liver disease
LH	: Luteinizing Hormone
IGF	: Insulin-like growth factor
PSA	: Prostate Specific Antigen
IR	: Insulin receptor
RP	: Radical Prostatectomy
AMPK	: Adenosine monophosphate kinase
SHBG	: Sex Hormone-Binding Globulin
ROS	: Reactive oxygen species
