Serbia and Montenegro	3	2	Free				

PR and CL stand for Political Rights and Civil Liberties. 1 represents the most free and 7 the least free category.

▲ up or down indicates a general trend in freedom.

▲▼ up or down indicates a change in Political Rights or Civil Liberties since the last survey.

The freedom ratings reflect an overall judgment based on survey results. See the essay on survey methodology for more details.

\* Excluding Northern Ireland.

Note: The ratings in this table reflect global events from January 1, 2003, through November 31, 2003.

**Explanatory notes**

\* CPI Score relates to perceptions of the degree of corruption as seen by business people and country analysts and ranges between 10 (highly clean) and 0 (highly corrupt).

\*\* Confidence range provides a range of possible values of the CPI score. This reflects how a country's score may vary, depending on measurement precision. Nominally, with 5 percent probability the score is above this range and with another 5 percent it is below. However, particularly when only few sources (n) are available an unbiased estimate of the mean coverage probability is lower than the nominal value of 90%

## Human development index

A composite index measuring average achievement in three basic dimensions of

living. For details on how the index is calculated, see Technical note 1.

HDI Rank ▼ ▲	Country ▼ ▲	Human development index

**Notes :**

The human development index values in this table were calculated using a consistent methodology and data series. They are not strictly comparable with those in earlier Human Development Reports. For detailed discussion, see Statistical feature 2, Note to table 1: About this year's human development index.

<sup>a</sup> The tendency of 2004 scores to be lower than 2003 scores is mainly due to a change in our methodology to include broadband penetration, which is still very low in most countries.

<sup>b</sup> Estonia, Latvia, Lithuania and Slovenia are new to the annual rankings and were not ranked in 2003.
