Acknowledgment

Thanks to Allah, most merciful, most graceful and most compassionate, for giving me the help and patience to achieve this work.

It is a great pleasure to express my sincere gratitude to **Prof. Dr. Eman Adel Seif**, *Professor of Forensic Medicine and Clinical Toxicology, Faculty of Medicine, University of Alexandria,* for her parenthood attitude, moral support, and endless scientific advice.

My gratitude and thanks go to **Dr. Fatma Mohamed Magdi Abd El Salam Badr Eldine**, lecturer of Forensic Medicine and Clinical Toxicology, Faculty of Medicine, *University of Alexandria,* for her generous efforts, keen supervision and meticulous guidance in the details of this work.

I would like to express my gratitude to the patients in this work, may Allah bless them all.

I extend my sincere thanks to everyone who in one way or another has contributed to the successful completion of this project.

LIST OF CONTENTS

Chapter		Page
ACKNOWLEDGMENT		**i**
LIST OF CONTENTS		**ii**
LIST OF TABLES		**iii**
LIST OF FIGURES		**iv**
LIST OF ABBREVIATIONS		**v**
I.	**INTRODUCTION**	**1**
	Definition of an elderly person	1
	Impact of aging on the occurrence and outcome of injury	2
	Classification of the most commonly encountered injuries among elderly population	2
	Trauma scoring systems	13
II.	**AIM OF THE WORK**	**16**
III.	**PATIENTS**	**17**
III.	**METHODS**	**18**
IV.	**RESULTS**	**27**
V.	**DISCUSSION**	**50**
VI.	**SUMMARY**	**57**
VII.	**CONCLUSIONS**	**60**
VIII.	**RECOMMENDATIONS**	**61**
IX.	**REFERENCES**	**62**
	PROTOCOL	
	ARABIC SUMMARY

LIST OF TABLES

Table		page
(1)	Shows coded values of each parameter in RTS	**19**
(2)	Shows the three parameters of the patient's best response to calculate the GCS	**20**
(3)	The Abbreviated Injury Scale, 1985	**22-25**
(4)	Distribution of the studied patients (n = 104) according to demographic data	**28**
(5)	Distribution of the studied patients (n = 104) according to site of injury	**35**
(6)	Distribution of the studied patients (n = 104) according to type of injury	**36**
(7)	Statistical analysis of TRISS	**37**
(8)	Relation between TRISS (%) and age	**37**
(9)	Relation between TRISS (%) and site of injury	**38**
(10)	Relation between TRISS (%) and type of injury	**39**
(11)	Statistical analysis of hospital stay	**41**
(12)	Correlation between hospital stay with TRISS (%)	**41**
(13)	Relation between hospital stay (days) and age	**42**
(14)	Relation between hospital stay (days) and site of injury	**42**
(15)	Relation between hospital stay (days) with type of injury	**43**
(16)	Relation between outcome and age	**45**
(17)	Relation between outcome and type of injury	**46**
(18)	Relation between outcome and site of injury	**47**
(19)	Relation between outcome and TRISS (%)	**48**
(20)	Relation between outcome and hospital stay (days)	**49**

LIST OF FIGURES

Figure		Page
1.	Distribution of the studied patients (n = 104) by age	29
2.	Distribution of the studied patients (n = 104) by sex.	29
3.	Distribution of the studied patients (n = 104) by marital status	30
4.	Distribution of the studied patients (n = 104) by smoking habits	30
5.	Distribution of the studied patients (n = 104) by residency	31
6.	Distribution of the studied patients (n = 104) by history of chronic illness	31
7.	Distribution of the studied patients (n = 104) by history of previous injury	32
8.	Distribution of the studied patients (n= 104) according to disability for daily activities	32
9.	Distribution of the studied patients (n = 104) according to month of admission	33
10.	Distribution of the studied patients (n=104) according to place of injury	33
11.	Distribution of the studied patients (n = 104) according to circumstances of injury	34
12.	Distribution of the studied patients (n=104) according to cause of injury	34
13.	Distribution of the studied patients (n=104) according to site of injury	35
14.	Distribution of the studied patients (n=104) according to type of injury	36
15.	Relation between TRISS (%) and type of injury	39
16.	Distribution of the studied patients (n=104) according to treatment received	40
17.	Correlation between hospital stay with TRISS (%)	41
18.	Relation between hospital stay (days) with type of injury	43
19.	Distribution of the studied patients (n=104) according to the outcome	44
20.	Relation between outcome and TRISS (%)	48
21.	Relation between outcome and hospital stay (days)	49

LIST OF ABBREVIATION

AAAM : Association for the Advancement of Automotive Medicine

AIS : Abbreviated injury scale

CT : Computed tomography

DM : Diabetes Mellitus

DSM-IV : The fourth edition of the Diagnostic and Statistical Manual of Mental Disorders

ED : Emergency Department

GCS : The Glasgow Coma Scale

GLF : Ground level fall

ISS : Injury Severity Score

MTOS : Major Trauma Outcome Study

NISS : New Injury Severity Score

PMC : Pre-existing medical conditions

ProFaNE : Prevention of Falls Network Europe

Ps : Probability of survival

PTSD : Post-traumatic stress disorder

RTS : The Revised Trauma Score

SD : Standard deviation

SDH : Subdural hematomas

SPSS-9 : Statistical Package for Social Sciences version 9

TBI : Traumatic brain injury

TBSA : Total body surface area

TRISS **:** Trauma score-Injury Severity Score

U.S. : United States

WHO **:** World Health Organization

$\mathbf{X^2}$ **:** Chi-square
