

ACKNOWLEDGEMENT

Thanks to **GOD** who gave me the power to carry out this work honestly and faithfully. Thanks to my father, my great leader, and to my mother, my inspirer, my brother, my saver, for their encouragement and support to accomplish this work. The few words written here can never express the feelings of gratitude and kind regards I have for my family.

I would like to express my deepest gratitude and appreciation to Prof. Dr. **Ahmed Mohamed El-Attar**, Professor of Anaesthesia and Surgical Intensive Care, Faculty of Medicine, University of Alexandria, who had made a great effort with me in this thesis, for his precious guidance, wise instructions, meticulous supervision, valuable experience and time, endless cooperation and for his true concern, support, and encouragement to accomplish this work in the best possible image.

Also, I wish to extend my appreciation and thanks to Prof. Dr. **Mohamed Shawky Abdel Aleem**, Professor of Anaesthesia and Surgical Intensive Care, Faculty of Medicine, University of Alexandria, for his continuous cooperation. Wishing him fast recovery and good health by GOD's will.

I am also greatly indebted and grateful to Dr. **Ragab Saad Beltagy**, Lecturer of Anaesthesia and Surgical Intensive Care, Faculty of Medicine, University of Alexandria, for his continuous follow up of this work and for the time and the effort he gave throughout this work. His faithful advice and help in every single step could never be forgotten. His care and containment besides his plenty experience and professional practice made me feel how much I am lucky to have such great brother and teacher.

Special thanks to all my colleagues who helped me in this thesis.

ACKNOWLEDGMENT	i
LIST OF CONTENTS	ii
LIST OF TABLES	iii
LIST OF FIGURES	v
LIST OF ABBREVIATIONS	vi
I. INTRODUCTION	1
II. AIM OF THE WORK	25
III. PATIENTS	26
IV. METHODS	27
V. RESULTS	32
VI. DISCUSSION	89
VII. SUMMARY	93
VIII. CONCLUSIONS	95
IX. RECOMMENDATIONS	96
X. REFERENCES	97
PROTOCOL	
ARABIC SUMMARY	

LIST OF TABLES

Table		Page
I.	Pharmacokinetic profile of dexmedetomidine.....	15
II.	Ramsey Sedation Score	29
III.	Comparison between the three studied groups regarding Age/year	33
IV.	Comparison between the three studied groups regarding Height/cm.....	35
V.	Comparison between the three studied groups regarding Sex.....	37
VI.	Comparison between the three studied groups regarding Duration of Operation/min	38
VII.	Heart Rate in Bupivacaine Group.....	41
VIII.	Heart Rate in Fentanyl Group.....	42
IX.	Heart Rate in Dex Group	43
X.	Comparison between the different studied groups regarding heart rate	44
XI.	MABP in Bupivacaine Group.....	47
XII.	MABP in Fentanyl Group.....	48
XIII.	MABP in Dex Group	49
XIV.	Comparison between the different studied groups regarding MABP.....	50
XV.	SAT/% in Bupivacaine Group.....	53
XVI.	SAT/% in Fentanyl Group	54
XVII.	SAT/% in Dex Group	55
XVIII.	Comparison between the different studied groups regarding SAT/%	56
XIX.	Sensory in Bupivacaine group	59
XX.	Sensory in Fentanyl group	60
XXI.	Sensory in Dex group	61
XXII.	Comparison between the three studied groups regarding sensory.....	62
XXIII.	VAS in Bupivacaine Group	65
XXIV.	VAS in Fentanyl Group	66
XXV.	VAS in Dex Group	67
XXVI.	VAS in different studied groups	68
XXVII.	Comparison between the three studied groups regarding time of first request for analgesia	69
XXVIII.	Comparison between the three studied groups regarding Total Diclofenac Na mg/24hr.....	72
XXIX.	Comparison between the three studied groups regarding Total Pethidine	74

Table	Page
mg/24hr.....	
XXX. Motor in Bupivacaine group.....	77
XXXI. Motor in Fentanyl group.....	78
XXXII. Motor in Dex group.....	79
XXXIII. Comparison between the three studied groups regarding Motor.....	80
XXXIV. Showing the different side effects on the three studied groups.....	84
XXXV. Comparison between the three studied groups regarding Total Ephedrine mg/24hr.....	85
XXXVI. Comparison between the three studied groups regarding Total Atropine dose mg/24hr.....	87

LIST OF FIGURES

Figure		Page
(1)	The vertebral column and the common features of the vertebrae.....	2
(2)	The coverings of the spinal cord	2
(3)	Lumbar puncture in the lateral position (Top view)	3
(4)	Surface landmarks for identifying spinal levels.....	4
(5)	Structures pierced by an advancing spinal needle in the midline approach .	4
(6)	Chemical structure of bupivacaine; 1-butyl-N-(2,6-dimethylphenyl) piperidine-2-carboxamide	8
(7)	Structural formula of dexmedetomidine	14
(8)	Structural formula of fentanyl.....	20
(9)	Comparison between the three studied groups regarding Age/year	34
(10)	Comparison between the three studied groups regarding Height/cm	36
(11)	Comparison between the three studied groups regarding Sex	37
(12)	Comparison between the three studied groups regarding Duration Of Operation/min	39
(13)	Comparison between the different studied groups regarding heart rate	45
(14)	Comparison between the different studied groups regarding MABP.....	51
(15)	Comparison between the different studied groups regarding SAT/%	57
(16)	Comparison between the three studied groups regarding sensory.....	63
(17)	Comparison between the three studied groups regarding time of first request for analgesia	70
(18)	Comparison between the three studied groups regarding Total Diclofenac Na mg/24hr.....	73
(19)	Comparison between the three studied groups regarding Total Pethidine mg/24hr.....	75
(20)	Comparison between the three studied groups regarding Motor.....	81
(21)	Showing the different side effects on the three studied groups	84
(22)	Comparison between the three studied groups regarding Total Ephedrine mg/24hr.....	86
(23)	Comparison between the three studied groups regarding Total Atropine dose mg/24hr.....	88

LIST OF ABBREVIATIONS

(-CNH-)	Amide linkage
/mL	Per milli litre
ASA & ACE	American Society of Anaesthesiologists and Angiotensin converting enzymes
CBF	Cerebral blood flow
CNS	Central nervous system
CO	Ester linkage
CSF	Cerebrospinal fluid
CVS	Cardiovascular
Dex	Dexmedetomidine
ECG	Electrocardiogram
FDA	Food and Drug Administration
GIT	Gastrointestinal tract
H₂	Histamine receptor two
hr	Hour
HR	Heart rate
ICP	Intracranial pressure
IM	Intramuscular
IV	Intravenous
Kg	Kilogram
L	Lumbar
L/hr	Litre per hour
LA	Local anaesthetics
MABP	Mean arterial blood pressure
MAC	Minimum alveolar concentration
ng	Nanogram
PO₂	Partial oxygen saturation
RBCs	Red blood cells
SPO₂	Oxygen saturation
t_{1/2}	Half life
TNS	Transient neurologic symptoms
TRI	Transient radicular irritation
VAS	Visual analogue scale
α	Alpha
α 2	Alpha two

β	Beta
Mg	Milligram
μg	Microgram
NE	Norepinephrine
