

# *Acknowledgement*

*Thanks to Allah  
for  
accomplishment of this work*

*I would like to express my appreciation and gratitude to **Professor Dr. Hesham EL-Sagheer**, professor of Orthopaedic Surgery, Faculty of Medicine, University of Alexandria for giving me the privilege of working and for his valuable supervision, instructions and encouragement through the whole work.*

*I am indebted to **Dr. Amin Abd EL-Razek**, assistant professor of Orthopaedic surgery, Faculty of Medicine, University of Alexandria for his earnest supervision through the course of the study and kindness to review each step in this work. He liberally gave me of his time, patience and experience. His generous advice was illuminative throughout the work.*

*I would like to thank **Professor Dr. Hany Morsy**, Professor of Orthopaedic Surgery and head of the Department, Faculty of Medicine, University of Alexandria for his skilful guidance and encouragement.*

*I acknowledge the help and advice of all the staff members of the department of Orthopaedic Surgery, El-Hadara University Hospital, to my colleagues and everyone who gave a hand and help for this work to appear in its present form. I'm really indebted to the radiology technicians and nurses in El-Hadara University Hospital for their co-operation.*

*Thanks to the patients who helped me to complete my thesis*

*I'm grateful to my family who encouraged me all the way.*

*Thanks to all those who shared either practically or morally in the accomplishment of this work.*

## LIST OF TABLES

<b>Table</b>		<b>page</b>
<b>I.</b>	Distribution of the studied cases according to age	<b>27</b>
<b>II.</b>	Distribution of the studied cases according to sex	<b>27</b>
<b>III.</b>	Distribution of the studied cases according to side	<b>27</b>
<b>IV.</b>	Distribution of the studied cases according to method of trauma	<b>28</b>
<b>V.</b>	Distribution of the studied cases according to type of fracture	<b>28</b>
<b>VI.</b>	Distribution of the studied cases according to Level of fracture	<b>28</b>
<b>VII.</b>	Distribution of the studied cases according to shape of fracture	<b>29</b>
<b>VIII.</b>	Distribution of the studied cases according to Associated injuries	<b>29</b>
<b>IX.</b>	Statistical analysis of the studied cases according to Time lapse before surgery	<b>29</b>
<b>X.</b>	TENS outcome score	<b>37</b>
<b>XI.</b>	Statistical analysis of the studied cases according to Time of clinical union	<b>40</b>
<b>XII.</b>	Statistical analysis of the studied cases according to Time of radiological union	<b>41</b>
<b>XIII.</b>	Distribution of the studied cases according to Limb length inequality	<b>42</b>
<b>XIV.</b>	Distribution of the studied cases according to Angulation	<b>43</b>
<b>XV.</b>	Relation between score and age	<b>44</b>
<b>XVI.</b>	Relation between score and sex	<b>45</b>
<b>XVII.</b>	Relation between score and side	<b>46</b>
<b>XVIII.</b>	Relation between score and time lapse before surgery (day)	<b>47</b>
<b>XIX.</b>	Relation between score and nail diameter (mm)	<b>48</b>
<b>XX.</b>	Relation between score and image time	<b>49</b>
<b>XXI.</b>	Relation between score and method of trauma	<b>50</b>
<b>XXII.</b>	Relation between score and type of fracture	<b>51</b>
<b>XXIII.</b>	Relation between score and level of fracture	<b>52</b>
<b>XXIV.</b>	Relation between score and shape of fracture	<b>53</b>
<b>XXV.</b>	Relation between score and associated injuries	<b>54</b>

## LIST OF FIGURES

<b>Figure</b>		<b>page</b>
(1)	Anterior view of the tibia and fibula	3
(2)	Posterior view of the tibia and fibula	3
(3)	Stages in the ossification of the tibia	4
(4)	Muscles of the leg	6
(5)	Blood supply to the tibia	7
(6)	Nerve supply to the tibia	8
(7)	Fascial compartments of the leg	9
(8)	Direct bone healing	11
(9)	Contact healing: cutting cone	12
(10)	Secondary bone healing	13
(11)	OTA classification of tibia/fibula diaphyseal fractures	17
(12)	Unilateral external fixator	20
(13)	Titanium nails	21
(14)	Biomechanical principle of the titanium elastic nail	22
(15)	Flexible intramedullary nailing	23
(16)	Implants and instruments	32
(17)	Patient positioning	33
(18)	Prebending the nail	33
(19)	Entry hole and first nail	34
(20)	The first nail advanced distally	35
(21)	The second nail	35
(22)	Nail retrieval	37
(23)	Distribution of the studied patients group according to score	39
(24)	Statistical analysis of the studied cases according to Time of clinical union	40
(25)	Statistical analysis of the studied cases according to Time of radiological union	41
(26)	Distribution of the studied cases according to Limb length inequality	42
(27)	Distribution of the studied cases according to Angulation	43
(28)	Relation between score and age	44
(29)	Relation between score and sex	45
(30)	Relation between score and side	46

<b>Figure</b>		<b>page</b>
