

## LIST OF FIGURES

Figure	Page
(1) The organs and their outlet tubes.....	2
(2) The ligaments of the pelvic floor perspective: standing position.....	3
(3) The muscles support the organs, vagina, bladder, and bowel .....	4
(4) An external striated muscle opening and closure mechanism.....	5
(5) Opening and closure muscles of the pelvic floor Perspective: sitting position	5
(6) The mechanism for urethrovesical closure.....	6
(7) Urethral tube closure .....	7
(8) The stress continence control system .....	8
(9) Pressure transmission theory and hypermobility.....	9
(10) Hammock theory .....	9
(11) Q-tip test.....	14
(12) Pubovaginal sling using rectus fascia.....	15
(13) Tension free vaginal tape (TVT) .....	16
(14) Insitu vaginal wall sling (ISS) technique.....	16
(15) Tension-Free Vaginal Flap (TVF).....	17
(16) Fashioning the top of the flap 2 cm below the urethral meatus.....	21
(17) Fashioning the bottom of the flap towards the bladder neck.....	21
(18) Rectangular flaps are created.....	22
(19) Perforation of the endopelvic fascia by Metzenbaum scissors.....	23
(20) Cauterization of the surface of the vaginal flap.....	24
(21) Placement of two diagonal rows of zero prolene suture.....	24
(22) Suspension of the rolled flap by two threads from both sides.....	25
(23) Passage of the Stamey needle through the suprapubic area guided by the index finger.....	25
(24) Passage of the end of the threads through the Stamey Needle eyelets.....	26
(25) Tying the threads over the rectus sheath .....	26
(26) Closure of the vaginal incision .....	27
(27) Bladder Outlet Obstruction Nomogram at 1 month follow up showing 4 patients with mild obstruction .....	36
(28) Bladder Outlet Obstruction Nomogram at 6 months follow up showing 2 patients with mild obstruction .....	37
(29) Post operative complications of studied women .....	39
(30) Mean quality of life percent score before and after operation.....	42

## LIST OF ABBREVIATIONS

<b>AHRQ</b>	Agency for Healthcare Research and Quality
<b>AVWS</b>	Anterior vaginal wall slings
<b>BOO</b>	Bladder Outlet Obstruction
<b>FDA</b>	Food and Drug Administration
<b>FVC</b>	Frequency Volume Chart
<b>ICD-9</b>	International Classification of Disease, 9th edition
<b>ICIQ</b>	International Committee for Incontinence Questionnaire
<b>ICIQ-UI-SF</b>	International Consultation on Incontinence Modular Questionnaire - Urinary Incontinence - Short Form
<b>ICS</b>	International Continence Society
<b>ISD</b>	Intrinsic Sphincter Deficiency
<b>Max Pdet</b>	Maximum detrusor pressure
<b>MUCP</b>	Maximal Urethral Closure Pressure
<b>OAB</b>	Overactive Bladder
<b>PdetQmax</b>	Detrusor pressure at maximum flow rate
<b>POP</b>	Pelvic Organ Prolapse
<b>Qmax</b>	Maximum flow rate
<b>QOL</b>	Quality of Life
<b>RFVF</b>	Rolled Fortified Vaginal Flap
<b>SUI</b>	Stress urinary incontinence
<b>TOT</b>	Trans Obturator Tape
<b>TVF</b>	Tension-Free Vaginal Flap
<b>TVT</b>	Trans-vaginal Tape
<b>UI</b>	Urinary Incontinence
<b>UPP</b>	Urethral Pressure Profile
<b>VLPP</b>	Valsalva leak point pressure
