

## LIST OF TABLES

Table	Page
(1) Differential diagnosis between AOS and dysarthria.	9
(2) Apraxia of speech distribution among the patient group.	25
(3) Age distribution among the three groups.	26
(4) Gender distribution among the three groups.	27
(5) Educational levels among the two groups (apraxic and non apraxic).	28
(6) Distribution of the apraxic and non apraxic group according to handedness.	29
(7) Distribution of the patients according to the clinical diagnosis.	30
(8) Distribution of the apraxic and non apraxic groups according to the diagnosis.	31
(9) Distribution of the patients according to the cause.	32
(10) Site of lesion in apraxic patients.	33
(11) Description of clinical features of patients with AOS.	34
(12) Distribution of the patients group according to Stanford Binet results.	35
(13) Distribution of the patients group according to TONI results.	37
(14) Distribution of the patients group according to Taylor test of anxiety results.	38
(15) Distribution of the apraxic patients according to the performance on MDVP, nasometer and aerodynamics studies.	39
(16) Distribution of the apraxic patients according to CSL results.	40
(17) Reliability coefficient values of various test items.	41
(18) Correlation between different test items.	42
(19) Comparison of the test results between apraxic patient, non apraxic patients (dysarthric or aphasic) and control.	43
(20) Comparison between performance of the Egyptian sample (Arabic) and English sample on ABA II.	44
(21) ROC curve details of subtest 1: Diadochokinetic rate.	45
(22) ROC curve details of subtest 2: Increased word length (Part A).	46
(23) ROC curve details of subtest 2: Increased word length (Part B).	46
(24) ROC curve details of subtest 3: Limb Apraxia.	47
(25) ROC curve details of subtest 3: Oral Apraxia.	47
(26) ROC curve details of subtest 4: Utterance time for polysyllabic words.	48

<b>Table</b>		<b>Page</b>
<b>(27)</b>	ROC curve details of subtest 5: Repeated trials.	<b>48</b>
<b>(28)</b>	ROC curve details of subtest 6: Inventory of articulation characteristics of AOS.	<b>49</b>
<b>(29)</b>	Sensitivity, specificity and the cut off scores of the various test items.	<b>50</b>

## LIST OF FIGURES

<b>Figure</b>		<b>Page</b>
(1)	Apraxia of speech distribution among the patient group.	25
(2)	Distribution of the patients group according to Stanford Binet results.	36
(3)	Distribution of the patients group according to TONI results.	37
(4)	Distribution of the patients group according to Taylor test of anxiety results.	38
(5)	The ROC curve of subtest 1: Diadochokinetic rate.	45
(6)	The ROC curve of subtest 2: Increased word length (Part A).	46
(7)	The ROC curve of subtest 2: Increased word length (Part B).	46
(8)	The ROC curve of subtest 3: Limb Apraxia.	47
(9)	The ROC curve of subtest 3: Oral Apraxia.	47
(10)	The ROC curve of subtest 4: Utterance time for polysyllabic words.	48
(11)	The ROC curve of subtest 5: Repeated trials.	48
(12)	The ROC curve of subtest 6: Inventory of articulation characteristics of AOS.	49

## LIST OF ABBREVIATIONS

<b>AOS</b>	: Apraxia of speech.
<b>ABA II</b>	: Apraxia Battery for Adults II.
<b>DVD</b>	: Developmental verbal dyspraxia.
<b>CAS</b>	: Childhood apraxia of speech.
<b>DAS</b>	: Developmental apraxia of speech.
<b>CLP</b>	: Central language processor.
<b>MSP</b>	: Motor speech programmer.
<b>SMA</b>	: The supplementary motor area.
<b>PNFA</b>	: Progressive non-fluent aphasia.
<b>PPAOS</b>	: Primary progressive apraxia of speech.
<b>UMN</b>	: Upper motor neuron.
<b>MSE</b>	: Motor speech examination.
<b>CT</b>	: Computerized tomography.
<b>EEG</b>	: Electroencephalogram.
<b>MRI</b>	: Magnetic resonance imaging.
<b>AMR</b>	: Alternating motion rate.
<b>RRA</b>	: Rapid repetitive articulation.
<b>DDK</b>	: Diadochokinesis.
<b>SMR</b>	: Sequential motion rate.
<b>VOT</b>	: Voice onset time.
<b>EMA</b>	: Electromagnetic articulography.
<b>EMG</b>	: Electromyography.
<b>EPG</b>	: Electropalatography.
<b>MIPT</b>	: Multiple Input Phoneme Therapy.
<b>SPT</b>	: Sound production treatment.
<b>MIT</b>	: Melodic intonation therapy.
<b>PROMPT</b>	: Prompts for Restructuring Oral Muscular Phonetic Targets.
<b>CSL</b>	: Computerized speech lab.
<b>MDVP</b>	: Multidimensional voice profile.
<b>ROC</b>	: Receiver operating characteristic curve.
<b>TONI</b>	: Test of non verbal intelligence.
<b>VC</b>	: Vital capacity.

**MFR** : Mean flow rate.  
**AUC** : Areas under the curves (AUC).
