LIST OF TABLES

Table		Page
I.	Socio-demographic features of breast-fed infants	15
II.	Mother′s education of the studied infants	16
III.	Mother's age of the studied infants	16
IV.	Breast feeding history of the studied infants	18
V.	Frequency of breast feeding	19
VI.	Weaning practice of the studied infants	20
VII.	Type of food intake by the studied infants	21
VIII.	Micronutrient supplementation	22
IX.	Duration of micronutrient supplementation	23
X.	Comparison between 3 & 6 months age groups as regard gross motor development (in percentile)	25
XI.	Comparison between 3 & 6 months age groups as regard fine motor development	29
XII.	Comparison between 3 & 6 months age groups as regard social & Language development	30
XIII.	Medical history of the studied infants	32
XIV.	Number of attacks	33
XV.	Number of hospital admission	34
XVI.	Relation between family history and infants skin allergy and time of food introduction	35
XVII.	Relation between family history and infants respiratory allergy and time of food introduction	36
XVIII.	Relation between family history and infants GIT allergy and time of food introduction	37
XIX.	Comparison between 3 & 6 months age groups as regard anthropometric measurements (in percentile)	39

List of Figures

Figure **Page**

1. Energy required by age and the amount from breast milk.……...…… 4
2. Factors affecting linear growth during the period of complementary feeding, ……..…… 6
3. Timing of Introduction of Complementary Food, short- and Long-Term Health Consequences…… 9
4. Relation between time of food introduction and time of sitting down without support in percentile…..…….…….…….. 26
5. Relation between time of food introduction and time of standing up with support in percentile……..…… 26
6. Relation between time of food introduction and time of hand –knee crawling in percentile…….…… 27
7. Relation between time of food introduction and time of walking with assistance in percentile……..……....27
8. Relation between time of food introduction and time of standing alone in percentile… ……..……...… 28
9. Relation between time of food introduction and time of walking alone in percentile…. ……...…. 28
10. Relation between time of food introduction and infant′s weight in percentile…..…. 40
11. Relation between time of food introduction and infant′s length in percentile…… 40
12. Relation between time of food introduction and infant′s head circumference in percentile…… 41
