

## LIST OF TABLES

<b>Table</b>		<b>Page</b>
<b>I</b>	Origin of cystic artery	<b>2</b>
<b>II</b>	Origin of cystic artery in different ethnic groups	<b>4</b>
<b>III</b>	Comparison between different energy modalities	<b>19</b>
<b>IV</b>	Grades of inflammation in Calot's triangle	<b>32</b>
<b>V</b>	Distribution of the studied cases according to demographic data	<b>35</b>
<b>VI</b>	Distribution of the studied cases according to co morbidities	<b>35</b>
<b>VII</b>	Distribution of the studied cases according to history of acute cholecystitis and recurrent biliary colics	<b>36</b>
<b>VIII</b>	Distribution of the studied cases according to inflammation grade in Calot's triangle	<b>36</b>
<b>IX</b>	Distribution of the studied cases according to artery number,site,size,grade and relation to LN	<b>38</b>
<b>X</b>	Distribution of the studied cases according to the use of Maryland or hook and number of pulses in cauterization group	<b>43</b>
<b>XI</b>	Distribution of the studied cases according to bleeding, drain usage, operative time and control time	<b>44</b>
<b>XII</b>	Positional variation of cystic artery	<b>48</b>

## LIST OF FIGURES

Figure		Page
1.	Boundaries of Calot's triangle	1
2.	Cystic artery diameter.	3
3.	Anatomic variations of the blood supply for the gallbladder	5
4.	Scheme for cystic artery anatomical variation	7
5.	Single cystic artery inside Calot's triangle	8
6.	Accessory cystic arteries	9
7.	Cystic artery outside Calot's triangle	10
8.	Single or double cystic arteries outside Calot's triangle	11
9.	Impact of elevated temperature on cells	16
10.	Formation of electrosurgically- induced vessel seal	16
11.	Electrosurgery modalities	18
12.	Zones of injury	21
13.	Direct coupling	22
14.	Insulation failure	23
15.	Capacitive coupling	24
16.	Example of one type of active electrode monitoring system used to detect insulation failure in laparoscopic instruments	25
17.	Single cystic artery	39
18.	Double cystic arteries	39
19.	Cystic artery inside Calot's triangle	40
20.	Cystic artery outside Calot's triangle(cystic artery lateral to cystic duct)	40
21.	Cystic artery outside Calot's triangle(cystic artery anterior to the duct)	41
22.	Intraoperative measurement of cystic artery diameter	41
23.	Cauterized and divided cystic artery before cystic duct clipping	42
24.	Large sized cystic artery efficiently cauterized	42

## LIST OF ABBREVIATIONS

<b>ALT</b>	Alanine Transaminase
<b>AST</b>	Aspartate Transaminase
<b>BDI</b>	Bile Duct Injury
<b>CA</b>	Cystic Artery
<b>CBD</b>	Common Bile Duct
<b>CD</b>	Cystic Duct
<b>CHA</b>	Common Hepatic Artery
<b>CHD</b>	Common Hepatic Duct
<b>CT</b>	Celiac Trunk
<b>DC</b>	Direct Current
<b>ESU</b>	Electrosurgical Unit
<b>GDA</b>	Gastroduodenal Artery
<b>GSD</b>	Gall Stone Disease
<b>HBsAg</b>	Hepatitis B Surface Antigen
<b>HCVAb</b>	Hepatitis C Virus Antibody
<b>INR</b>	International Normalization Ratio
<b>LC</b>	Laparoscopic Cholecystectomy
<b>LHA</b>	Left Hepatic Artery
<b>LN</b>	Lymph Node
<b>No.</b>	Number
<b>PT</b>	Prothrombin Time
<b>PTT</b>	Partial Thromboplastin Time
<b>RHA</b>	Right Hepatic Artery
<b>Sec</b>	Seconds
<b>UAS</b>	Ultrasonically Activated Shear
<b>USA</b>	United States of America
