

LIST OF FIGURES

Figure		page
(1)	Benzydamine Hydrochloride chemical structure	6
(2)	Lignocaine chemical structure	8
(3)	Fluticasone propionate chemical structure	8
(4)	Comparison between the three studied groups according to heart rate	17
(5)	Comparison between the three studied groups according to mean arterial blood pressure	20
(6)	Comparison between the three studied groups according to pulse oximetric O ₂ saturation (S _p O ₂)	22
(7)	Upper airway obstruction score for benzydamine	23
(8)	Upper airway obstruction score for lignocaine	24
(9)	Upper airway obstruction score for fluticasone	25
(10)	Postoperative sore throat score for benzydamine	27
(11)	Postoperative sore throat score for lignocaine	28
(12)	Postoperative sore throat score for fluticasone	29

LIST OF ABBREVIATIONS

BH	: Benzylamine Hydrochloride.
Cm	: Centimetre.
CYP3A4	: Cytochrome P 450, family 3, subfamily polypeptide 4.
DAP	: Diastolic arterial blood pressure.
ETT	: Endotracheal tube.
ECG	: Electrocardiogram.
FIO₂	: Inspired oxygen fraction.
H	: Hydrogen.
H₂O	: Dihydrogen monoxide.
HR	: Heart rate.
ICU	: Intensive care unit.
IV	: Intravenous.
Kg	: Kilogram.
MAP	: Mean arterial blood pressure.
Mcg	: Micogram.
MEGX	: Monoethylglycinexylidide.
Mg	: Milligram.
Min	: Minute.
ml	: Millilitre.
Mm Hg	: Millimetre mercury.
N	: Nitrogen.
Na	: Sodium.
NSAIDS	: Non steroidal anti-inflammatory drugs.
PACU	: Post anaesthesia care unit.
PAN	: Primary afferent neuron.

PEEP	: Positive end expiratory pressure.
PES	: Postextubation stridor.
PK_a	: Acid dissociation constant.
POST	: Postoperative sore throat.
PVC	: Polyvinyl chloride.
SAP	: Systolic arterial blood pressure.
S_pO₂	: Pulse oximetric oxygen saturation.
